Sustainability Walter Leal Filho,2019-01-14 This book comprehensively describes social responsibility and sustainable development with contributions from scientists and representatives from industry working in the field The papers are innovative cross cutting and many share practice based experiences some of which may be replicable elsewhere Prepared by the Inter University Sustainable Development Research Programme IUSDRP and the World Sustainable Development Research and Transfer Centre WSD RTC it reiterates the current need to promote social responsibility Social responsibility and sustainable development are two different concepts whose integration over the years has led to significant advances in the way enterprises see and perceive their operations It is not only about policies or steps taken to meet legal requirements but is also about social equality and environmental accountability also bearing in mind the links with eco efficiency innovation and the health and wellbeing of workers According to ISO 26000 social responsibility is the responsibility of an organisation for the impacts of its decisions and activities on society and the environment through transparent and ethical behaviour that a contributes to sustainable development including health and the welfare of society b takes into account the expectations of stakeholders c is in compliance with applicable law and consistent with international norms of behaviour d is integrated throughout the organisation and practised in its relationships But even though the relations between social responsibility and sustainability are strong it is still necessary to encourage organisations to adhere to or at least follow the principles of sustainable development in their operations giving something back to the community As such there is a need for a better understanding of how social responsibility is related to sustainable development and of the identification of processes methods and tools that may help the integration of these two important elements There is also a real need to showcase successful examples of how to structure behaviour and institutional practice in line with the sustainability challenges we face today Chapter Reviewing the Stakeholder Value Creation Literature Towards a Sustainability Approach is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com) [Sustainable Practices: Concepts, Methodologies, Tools, and Applications](#) Management Association, Information Resources,2013-12-31 This reference explores some of the most recent developments in sustainability delving into topics beyond environmental science to cover issues of sustainable economic political and social development Provided by publisher [Sustainability in Project Management](#) Anna Brzozowska,Arnold Pabian,Barbara Pabian,2021-04-01 This book presents a new approach to the issue of project management showing how it can be approached through the lens of sustainability The nature of sustainable project management is not only to achieve economic goals but also environmental and social ones Considering project

management from the perspective of sustainability is very important because sustainable development cannot keep up with the pace and scale of accumulation of ecological and social problems The natural potential of the Earth is quickly running low The global equilibrium between the Earth s ecosystems which have developed for millions of years and the human world of production and consumption becomes disrupted The focus is on a functional approach to the subject allowing management and business to implement the methodology discussed Topics discussed include sustainable planning sustainable organizing sustainable leading and sustainable controlling The authors use their combined experience in the area to inform their novel approach The book will be especially useful for people who are project managers members of project teams and other project stakeholders It may also be a useful reference for scientists and students studying the fields of management IT and business
