Less dense

Light color

Narrow leaves

Leaves

Indica

Wide broad leaves

Short

Stocky stature

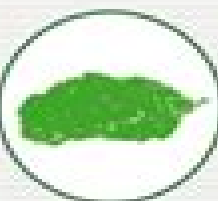

Deep color

Ruderalis

Ruderalis is the smallest of the three, it has narrow palmate-shaped leaves. Ruderalis switches automatically from the vegetative phase to the flowering stage with age rather than light cycles like sativas or indicas. It also has a shorter growth period. Ruderalis doesn't have a psychoactive effect, but is sometimes crossbred with indicas or sativas to produce an "autoflowering" hybrid.

Cannabis Growing Guide J. B. Haze, 2023-03-14 Haze begins his book with an important explanation about genetics and why growers should care about them both from a practical standpoint and as a hobbyist highlighting the joy of growing alongside technical knowledge That same enthusiasm carries into the next section as Haze discusses the importance of the growing environment An exploration of the history of cross breeding strains precedes a discussion of the different attributes that growers may want to cultivate in their own strains Logically following the discussion of genetics Haze guides readers through selecting seeds and explains the difference between a Haze plant and a Kush plant He then continues his discussion of seeds by explaining what makes a good seed and a solid starting point for one's growing adventure Haze acknowledges that not everyone is lucky enough to live in an environment perfect for growing marijuana and may need some pointers on how to select the seeds and strains that will provide the best possible result in whichever environment readers may reside He explains the different types of seeds growers can buy their pros and cons and provides seed bank recommendations so that readers will know both what they want and where to get it With all the seed information squared away Haze moves on to discussing soil Soil may seem an unusual point of focus isn't it just dirt But Haze proves through his thorough explanation that soil is paramount to getting the best yield His method of versatile pot assembly provides insulation nutrients and water to marijuana plants for weeks at a time making it easier for growers to get the results they want The author leads readers through preparing the pots and soil for planting exposes the surprising dangers of chemicals in water and teaches readers how to filter them out and discusses how to balance the pH of the soil Haze continues his in depth descriptions as he guides readers through the various other obstacles of the germination process such as controlling temperature and moisture without disturbing the seeds or stunting growth His method of watering the seeds is particularly helpful to beginners as a frequent slip up is to dehydrate the seeds as they try to get moisture when using the traditional paper towel technique Haze's

alternative technique allows excited growers to easily observe seeds as they germinate without causing a shake up and uses easily obtainable materials and has a 99% success rate With the beginning stages out of the way Haze coaches readers through the first growth plant puberty if you will He discusses the proper way to pot the seed and the best lighting set up so readers can look forward to the joy of seeing those first little leaves Haze also explains how to inoculate against pests an ingenious way of preventing pests from pestering plants Even if pests do make it to the plants Haze has a way of dealing with them that will save any plants that have been accosted by unwelcome guests He also takes care to mention the potential dangers of sharing your growing location with other people as they may inadvertently cause some chaos and cautions readers to take the safety of their plants seriously Haze generously shares his surefire method of cloning one of the most important pieces of information for growers who have found their perfect combination of attributes Haze demystifies the process and explains it in simple terms that makes the whole operation seem less intimidating than the serious sounding name implies He goes on to distinguish the difference between a bud and a flower demonstrates how to calibrate a bud to get the preferred medicinal effects and explains how to determine the best time to harvest a plant After writing a full book on the topic Haze s chapter on regeneration is as thorough and nuanced as it can be From explanations of how the process works to how to use tipping in order to increase yield everything is laid out in a way that is both detailed and easy to understand Haze also provides a specific timeline for when to expect results so that no one is left guessing about when to expect success The author also uses his years of growing experience to help readers auto dry their crop to perfection and provides tips on how to minimize handling the plants in order to avoid damaging them and ruining the harvest With over 150 dazzling photographs by the author and easy to implement instructions Title is the perfect book for anyone looking to update their growing methodology and get the best buds possible Full of sage advice and charming personality this book is what old fashioned growers and newbies alike need to read in order to keep growing marijuana fun and fruitful *Cannabis* Joseph
