

Periodic Maintenance

Proper maintenance, including periodic inspection and regular lubrication with the correct lubricant, is essential to the long life and trouble-free operation of your new MF 35 Diesel Tractor. Form the habit of performing scheduled maintenance by using the accumulated hours recorded on the tractorometer. Always keep your tractor in "top-notch" condition by servicing it as recommended. Take any major repair items to your local MF Dealer, he has the proper "know-how" and tools to render the type of service which will keep your tractor in the best possible condition. This section of your manual is devoted entirely to maintenance and should be referred to as a quick reference when periodic servicing is performed.

LUBRICATION

Care should always be exercised when handling all types of lubricants. Open containers invite and collect dirt which may cause very serious damage to the lubricated parts. Secure a good grade of pressure gun lubricant from a reliable supplier to be used in the pressure-type grease fittings. Always wipe off a grease fitting before lubrication to prevent the entrance of dirt.

The points listed below should be lubricated periodically. The number in the boxes beside each point indicate the hours of operation after which these points should be serviced. The parts and time intervals are marked in the illustrations for your convenience.
