concluding chapter of the volume describes the implementation of these expert recommendations in the substantive offerings of and the accompanying research on the Haus der kleinen Forscher Foundation

The Moral Philosophy of Maria Montessori Patrick Frierson, 2022-11-17 In the first scholarly exposition of Maria Montessori's moral philosophy Patrick R. Frierson presents an empirically grounded ethics that takes its start from our tendency to strive for excellence and emphasizes mutual respect, social solidarity and love. Laying out a compelling Montessorian approach to ethical life, Frierson constructs an account of human agency based on children who when attentively at work on self-chosen tasks have agency worthy of respect. Through this interpretation of children's agency he introduces the core concept of Montessorian character in Montessori's ethics: character provides the ultimate value worthy of direct respect and those with character have a natural tendency to respect others. Character is enhanced through corporate forms of agency that Montessori calls social solidarity. Weaving this educationalist's ethics with theory from Nietzsche, Aristotle, Kant, Hegel and Marx, Frierson places Montessori in the context of the history of philosophy. His study effectively unites philosophy and education, showing how human ethical life can be enhanced through a moral theory based on the respectful attention to the lived agency of young children.

Proceedings of I4SDG Workshop 2025 - IFToMM for Sustainable Development Goals Giuseppe Carbone, Giuseppe Quaglia, 2025-05-23 This book contains the proceedings of the 3rd IFToMM Workshop for Sustainable Development Goals I4SDG held in Lamezia Terme, Italy, on June 9-11, 2025. The workshop papers are focused on those aspects of the theory, design and applications of mechanism and machine science that are fundamental for moving toward sustainable development. The main topics of the workshop are sustainable energy systems, robotics and mechatronics, biomechanical and medical systems, education, linkages, gears, transmissions and actuators, engines and powertrains, tribology, transportation machinery, service systems for sustainability, humanitarian engineering and socio-technical systems for sustainable and inclusive development. The contributions, selected through a rigorous international peer review process, highlight many exciting ideas that will drive new research directions and foster multidisciplinary collaboration between researchers from different backgrounds.
