Going Mobile Chords:

The New Digital Natives Alexei Dingli, Dylan Seychell, 2015-03-17 The first generation of Digital Natives DN's is now growing up However these digital natives were rather late starters since their exposure to computers started when they could master the mouse and the penetration of computers in educational institutions was still very low Today a new breed of digital natives is emerging This new breed includes those individuals who are being introduced from their first instances to the world of wireless devices One year olds manage to master the intuitive touch interfaces of their tablets whilst sitting comfortably in their baby bouncers The controller less interfaces allow these children to interact with a machine in a way which was unconceivable before Thus our research investigated the paradigm shift between the different generations of digital natives We analysed the way in which these two generations differ from each other and we explored how the world needs to change in order to harness the potential of these new digital natives

This e-book details the most interesting and important characteristics of the automobile: car maintenance, styling, features, car body style, the standard classification of the cars, an history of the automobile's introduction in the automotive industry and the traffic code rules and signs. An automobile, usually called a car, an old word for carriage or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with motor referring to what is now usually called the engine. It has seats for the driver and almost without exception for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction in New York City, over 10 000 tons of manure had to be removed from the streets daily. However, in 2006, the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects. **The Who by Numbers** Steve Grantley, Alan Parker, Sean Body, 2010. Emerging from the mid 1960s R B mod scene with furious teenage anthems like My Generation, The Who were the wildest, angriest and loudest kids on the block. And in spite of Townshend's most famous line, 'hope I die before I get old', and unlike so many of their rivals, The Who lived to forge more mature works in the late 1960s and the 1970s with the phenomenal success of their pioneering rock opera Tommy, their revered song collection *Who's Next* and Townshend's mod masterpiece *Quadrophenia*. Mobile Narratives Eleftheria Arapoglou, Mónika Fodor, Jopi Nyman, 2013-08-15. Emphasizing the role of travel and migration in the performance and transformation of identity, this volume addresses representations of travel, mobility and migration in 19th-21st century travel writing, literature and media texts. In so doing, the book analyses the role of the various cultural, ethnic, gender and national encounters pertinent to narratives of travel and migration in transforming and problematizing the identities of both the travelers and travelees enacting in the borderzones between cultures. While the individual essays by scholars from a wide range of countries deal with a variety of case studies from various historical, spatial and cultural locations, they share a strong central interest in the ways in which the narratives of travel contribute to the imagining of ethnic encounters and how they have acted as sites of transformation and transculturation from the early nineteenth century to the present day. In addition to discussing textual representations of travel and migration, the volume also addresses the ways in which cultural texts themselves travel and are reconstructed in various cultural settings. The analyses are particularly attentive to the issues of globalization and migration which provide a general frame for interpretation. What distinguishes the volume from existing books is its concern with travel and migration as ways of forging transcultural identities that are able to subvert existing categorizations and binary models of identity formation. In so doing, it pays particular attention to the performance of identity in various spaces of cultural encounter, ranging from North America to the East of Europe, putting particular emphasis on the representation of intercultural and ethnic encounters. *Not Bored!
