Grass In Search Of Human Habitat Organisms And Environments:

Grass Joe C. Truett, 2009-11-03 Part autobiography part philosophical rumination this evocative conservation odyssey explores the deep affinities between humans and our original habitat grasslands In a richly drawn anecdotally driven narrative Joe C Truett a grasslands ecologist who writes with a flair for language traces the evolutionary historical and cultural forces that have reshaped North American rangelands over the past two centuries He introduces an intriguing cast of characters wildlife and grasslands biologists archaeologists ranchers and petroleum geologists to illuminate a wide range of related topics our love affair with turf and how it manifests in lawns and sports the ecological and economic dimensions of ranching the glory of cowboy culture grasslands and restoration ecology and more His book ultimately provides the background against which we can envision a new paradigm for restoring rangeland ecosystems and a new paradigm for envisioning a more sustainable future

Evolution's Wedge David W. Pfennig, Karin S. Pfennig, 2012-10-25 Despite Darwin's emphasis competition's role in diversification remains controversial and largely underappreciated

Serendipity James A. Estes, 2020-11-10 Many of the findings in the book are classics of ecology A rare and delightful insight into timely science Jane Lubchenco Nature Estes's refreshing narrative deftly weaves rigorous science with personal reflection to create an absorbing and introspective read that is equal parts memoir ecological textbook and motivational guidebook for young ecologists Science To newly minted biologist James Estes the sea otters he was studying in the leafy kelp forests off the coast of Alaska appeared to have an unbalanced relationship with their greater environment Gorging themselves on the sea urchins that grazed among the kelp these small charismatic mammals seemed to give little back in return But as Estes dug deeper he unearthed a far more complex relationship between the otter and its underwater environment discovering that otters play a critical role in driving positive ecosystem dynamics While teasing out the connective threads he began to question our assumptions about ecological relationships These questions would ultimately inspire a lifelong quest to better understand the surprising complexity of our natural world and the unexpected ways we discover it *Serendipity* tells the story of James Estes's life as a naturalist and the concepts that have driven his interest in researching the ecological role of top level predators Using the relationships between sea otters kelp and sea urchins as a touchstone Estes retraces his investigations of numerous other species ecosystems and ecological processes in an attempt to discover why ecologists can learn so many details about the systems in which they work and yet understand so little about the broader processes that influence these systems Part memoir part natural history and deeply inquisitive *Serendipity* will entertain and inform readers as it raises thoughtful questions about our relationship with the natural world

In Search of Consistency: Ethics and Animals Lisa Kemmerer, 2006-08-01 *In Search of Consistency* is the most comprehensive examination to date of moral theories and animal ethics This large volume unveils and explores the work of Tom Regan rights theory Peter Singer utilitarian Paul Taylor environmental ethics and Andrew Linzey theology not only digging deep into critical analysis of extant theories but feeding

the flames of a now flourishing dialogue at the intersections of animal ethics environmental ethics and religious ethics This book ultimately presents a new approach the Minimize Harm Maxim which exposes through real and hypothetical scenarios common practices as patently irrational and raises questions few authors are willing to entertain about the way we value life and our attitudes toward death At every turn In Search of Consistency reminds that ethics carry an expectation of action that ethics are intended to guide how we live

A Sea of Glass Drew Harvell, 2016-05-17 The author makes an eloquent plea for marine biodiversity conservation Library Journal Harvell seems to channel the devotion that motivated the Blaschkas The Guardian Winner of the 2016 National Outdoor Book Award Environment Category It started with a glass octopus Dusty broken and all but forgotten it caught Drew Harvell's eye Fashioned in intricate detail by the father son glassmaking team of Leopold and Rudolf Blaschka the octopus belonged to a menagerie of unusual marine creatures that had been packed away for decades in a storage unit More than 150 years earlier the Blaschkas had been captivated by marine invertebrates and spun their likenesses into glass documenting the life of oceans untouched by climate change and human impacts Inspired by the Blaschkas uncanny replicas Harvell set out in search of their living counterparts In A Sea of Glass she recounts this journey of a lifetime taking readers along as she dives beneath the ocean's surface to a rarely seen world revealing the surprising and unusual biology of some of the most ancient animals on the tree of life On the way we glimpse a century of change in our ocean ecosystems and learn which of the living matches for the Blaschkas creations are indeed as fragile as glass Drew Harvell and the Blaschka menagerie are the subjects of the documentary Fragile Legacy which won the Best Short Film award at the 2015 Blue Ocean Film Festival Conservation Summit Learn more about the film and check out the trailer here [Educational Film Catalog for Bureau of Indian Affairs Schools](#) United States.
