Mathematics La Soci t Canadienne d Histoire et de Philosophie des Math matiques held in Washington D C In addition to showcasing rigorously reviewed modern scholarship on an interesting variety of general topics in the history and philosophy of mathematics this meeting also honored the memories of Jacqueline Jackie Stedall and Ivor Grattan Guinness celebrated the Centennial of the Mathematical Association of America and considered the importance of mathematical communities in a special session These themes and many others are explored in these collected papers which cover subjects such as New evidence that the Latin translation of Euclid s Elements was based on the Arabic version attributed to al aji j Work done on the arc rampant in the seventeenth century The history of numerical methods for finding roots of nonlinear equations An original play featuring a dialogue between George Boole and Augustus De Morgan that explores the relationship between them Key issues in the digital preservation of mathematical material for future generations A look at the first twenty five years of The American Mathematical Monthly in the context of the evolving American mathematical community The growth of Math Circles and the unique ways they are being implemented in the United States Written by leading scholars in the field these papers will be accessible to not only mathematicians and students of the history and philosophy of mathematics but also anyone with a general interest in mathematics

Russian Mathematicians In The 20th Century

Yakov Sinai, 2003-10-08 In the 20th century many mathematicians in Russia made great contributions to the field of mathematics This invaluable book which presents the main achievements of Russian mathematicians in that century is the first most comprehensive book on Russian mathematicians It has been produced as a gesture of respect and appreciation for those mathematicians and it will serve as a good reference and an inspiration for future mathematicians It presents differences in mathematical styles and focuses on Soviet mathematicians who often discussed what to do rather than how to do it Thus the book will be valued beyond historical documentation The editor Professor Yakov Sinai a distinguished Russian mathematician has taken pains to select leading Russian mathematicians such as Lyapunov Luzin Egorov Kolmogorov Pontryagin Vinogradov Sobolev Petrovski and Krein and their most important works One can for example find works of Lyapunov which parallel those of Poincar and works of Luzin whose analysis plays a very important role in the history of Russian mathematics Kolmogorov has established the foundations of probability based on analysis The editor has tried to provide some parity and at the same time included papers that are of interest even today The original works of the great mathematicians will prove to be enjoyable to readers and useful to the many researchers who are preserving the interest in how mathematics was done in the former Soviet Union

Philosophy of Meaning, Knowledge and Value in the Twentieth Century

John Canfield, 2012-10-12 Volume 10 of the Routledge History of Philosophy presents a historical survey of the central topics in twentieth century Anglo American philosophy It chronicles what has been termed the linguistic turn in analytic philosophy and traces the influence the study of language has had on the main problems of philosophy Each chapter contains an extensive bibliography of the major writings in the field All the essays present their large and complex topics in a clear and

well organised way At the end the reader finds a helpful Chronology of the major political scientific and philosophical events in the Twentieth Century and an extensive Glossary of technical terms

The Book Worlds of East Asia and Europe, 1450-1850 Joseph P. McDermott, Peter Burke, 2015-10-01 This volume provides the first comparative survey of the relations between the two most active book worlds in Eurasia between 1450 and 1850 Prominent scholars in book history explore different approaches to publishing printing and book culture They discuss the extent of technology transfer and book distribution between the two regions and show how much book historians of East Asia and Europe can learn from one another by raising new questions exploring remarkable similarities and differences in these regions production distribution and consumption of books The chapters in turn show different ways of writing transnational comparative history Whereas recent problems confronting research on European books can instruct researchers on East Asian book production so can the privileged role of noncommercial publications in the East Asian textual record highlight for historians of the European book the singular contribution of commercial printing and market demands to the making of the European printed record Likewise although production growth was accompanied in both regions by a wider distribution of books woodblock technology s simplicity and mobility allowed for a shift in China of its production and distribution sites farther down the hierarchy of urban sites than was common in Europe And the different demands and consumption practices within these two regions expanding markets led to different genre preferences and uses as well as to the growth of distinctive female readerships A substantial introduction pulls the work together and the volume ends with an essay that considers how these historical developments shape the present book worlds of Eurasia This splendid volume offers expert new insight into the ways of producing financing distributing and reading printed books in early modern Europe and East Asia This is comparative history at its best which leaves us with a better understanding of each context and of the challenges common to book cultures across space and time

Ann Blair author of *Too Much to Know* Managing Scholarly Information before the Modern Age and professor of history Harvard University This engrossing account of the history of the book by leading specialists on the European and East Asian publishing worlds takes stock of what we know and how much we still need to know about the places that books had in the lives of our early modern forebears Each chapter is masterful state of the field coverage of its subject and together they set a new standard for future studies of the book East and West
