**Marine Fouling of Titanium Heat Exchangers** Wayne L. Adamson, DAVID W TAYLOR NAVAL SHIP RESEARCH AND DEVELOPMENT CENTER ANNAPOLIS MD PROPULSION AND AUXILIARY SYSTEMS Dept, 1976 A series of marine fouling experiments was conducted at Freeport Texas on two single pass titanium heat exchangers The exchangers which were constructed with commercially pure titanium tubes 5 8 inch 1 59 centimeter outside diameter by 30 inch 76 3 centimeter length and 6Al 4V alloy tube sheets and headers were operated on natural seawater One of the exchangers was fed electrolytically chlorinated seawater while the other was run with untreated seawater feed Velocity and chlorination levels were varied to determine the effect of these two variables on fouling of the titanium surfaces Operating conditions similar to those that might be expected in shipboard heat exchanger condenser usage were modeled

**Manual of Biocorrosion** Hector A. Videla, 2018-04-27 The Manual of Biocorrosion explains the microbiology electrochemistry and surface phenomena involved in biocorrosion and biofouling processes Written primarily for non specialists the information in this manual is practical and offers a comprehensive look at the three components of biocorrosion the microorganisms the metal and the aqueous environment It also addresses methods for the monitoring prevention and control of biocorrosion The first part of the book covers the fundamental aspects of microbiology electrochemistry and biofouling of metal surfaces The second half describes biocorrosion assessment in the laboratory and the field the main control and mitigation procedures used practical case studies and laboratory methods and formulations The Manual of Biocorrosion is the book the industrial sector water treatment plants oil refineries etc has been waiting for providing the basics for implementing prevention control and mitigation procedures In addition it covers the latest industry trends with discussions of biocide selection strategies for treating biocorrosion without harming the environment and the latest monitoring programs The academic sector will benefit as well from the up to date information on mechanisms and recent advances in all biocorrosion aspects and technology Research trends such as the application of surface analysis techniques and modern electron microscopy the use of conventional and innovative electrochemical techniques for assessment and microbial inhibition of corrosion are all considered Features 100 illustrations provide you with a visual understanding of the problems and techniques discussed 30 tables give you quick access to data 46 suggested readings provide references on books conference and workshop proceedings and special issues of scientific journals and technical publications specifically devoted to biocorrosion and biofouling 454 reference

Bott,Carlos A. Bernardo,2012-12-06 The fouling of heat exchangers reactors and catalysts remains one of the most urgent problems facing the process industries Over the past ten years there has been limited research and investigation into the underlying mechanisms which give rise to this problem For convenience particularly in heat exchanger technology the mechanisms involved have been subdivided into different subject areas It is often the situation that individuals or groups of workers have concentrated efforts in one or two of these specialist areas and there is a need to integrate the ideas across the whole spectrum of the subject In addition topics such as adhesion and surface phenomena have not been properly taken into account up till now in the assessment of the fouling processes For this reason it was considered essential that the recognised experts from around the world who are actively concerned with research development and design in the field should meet and exchange ideas and experience Such a meeting was held at Alvor Portugal in May 1987 sponsored by the NATO Advanced Study Institutes Programme In order to obtain a common basis for the work of the Advanced Study Institute the whole technological field was reviewed right from the basic concepts to the frontiers of present knowledge Each invited contributor was asked to make an overall presentation covering his or her area of expertise      **Micro- and Macrofouling in the OTEC Program** Ralph Mitchell,1980
