Marine Conservation P. Keith Probert, 2017-07-06 A crucial timely synthesis of issues and solutions for the conservation of the world's seas and marine life

Habitat Suitability and Distribution Models Antoine Guisan, Wilfried Thuiller, Niklaus E. Zimmermann, 2017-09-14 This book introduces the key stages of niche based habitat suitability model building evaluation and prediction required for understanding and predicting future patterns of species and biodiversity Beginning with the main theory behind ecological niches and species distributions the book proceeds through all major steps of model building from conceptualization and model training to model evaluation and spatio temporal predictions Extensive examples using R support graduate students and researchers in quantifying ecological niches and predicting species distributions with their own data and help to address key environmental and conservation problems Reflecting this highly active field of research the book incorporates the latest developments from informatics and statistics as well as using data from remote sources such as satellite imagery A website at www.unil.ch/hsdm contains the codes and supporting material required to run the examples and teach courses

Invading Ecological Networks Cang Hui, David Richardson, 2022-01-13 Until now biological invasions have been conceptualised and studied

mainly as a linear process from introduction to establishment to spread This volume charts a new course for the field drawing on key developments in network ecology and complexity science It defines an agenda for Invasion Science 2.0 by providing new framings and classification of research topics and by offering tentative solutions to vexing problems In particular it conceptualises a transformative ecosystem as an open adaptive network with critical transitions and turnover with resident species heuristically learning and fine tuning their niches and roles in a multiplayer eco evolutionary game It erects signposts pertaining to network interactions structures stability dynamics scaling and invasibility It is not a recipe book or a road map but an atlas of possibilities a hitchhiker's guide

Comparative Plant Succession Among Terrestrial Biomes of the World Karel Prach, Lawrence R. Walker, 2020-05-14 Provides a comparative approach to plant succession among all terrestrial biomes and disturbances helping to reveal generalizable patterns

Conserving Africa's Mega-Diversity in the Anthropocene Joris P. G. M. Cromsigt, Sally Archibald, Norman Owen-Smith, 2017-03-02 This book synthesises key insights from a century of ecological research and monitoring efforts in one of Africa's oldest protected areas

Ecosystem Collapse and Recovery Adrian C. Newton, 2021-04-22 There is a growing concern that many important ecosystems such as coral reefs and tropical rain forests might be at risk of sudden collapse as a result of human disturbance At the same time efforts to support the recovery of degraded ecosystems are increasing through approaches such as ecological restoration and rewilding Given the dependence of human livelihoods on the multiple benefits provided by ecosystems there is an urgent need to understand the situations under which ecosystem collapse can occur and how ecosystem recovery can best be supported To help develop this understanding this volume provides the first scientific account of the ecological mechanisms associated with the collapse of ecosystems and their subsequent recovery After providing an overview of relevant theory the text evaluates these ideas in the light of available empirical evidence by profiling case studies drawn from both contemporary and prehistoric ecosystems Implications for conservation policy and practice are then examined

Curious About Nature Tim Burt, D. B. A. Thompson, Des Thompson, 2020-02-20 Proclaims the enjoyment of teaching studying and learning outdoors via the inspirational stories of some remarkable people

Joint Species Distribution Modelling Otso Ovaskainen, Nerea Abrego, 2020-06-11 A comprehensive account of joint species distribution modelling covering statistical analyses in light of modern community ecology theory

Nature's Wealth Pieter van Beukering, 2013-03-28 Presents new evidence from more than twenty countries on the role of ecosystems in supporting the livelihoods of the poor

Ecology and Management of the African Buffalo Alexandre Caron, Daniel Cornélis, Philippe Chardonnet, Herbert H. T. Prins, 2023-11-23 One of iconic Africa's Big Five the African buffalo is the largest African bovine or antelope that occurs throughout most of sub-Saharan Africa and in a wide range of ecosystems from savanna to rainforest The African buffalo is also one of the most successful large African mammals in terms of abundance and biomass This species thus represents a powerful model to enhance our understanding of African biogeography and wildlife conservation ecology and management Edited by four researchers experienced in different aspects

of the African buffalo's biology this volume provides an exhaustive compilation of knowledge on an emblematic species that stands out as an important component of African natural and human ecosystems. It delivers a global view of the African buffalo and all known aspects of its ecology and management. This book will appeal to students, scholars, scientists, and wildlife managers as well as those enthusiastic about the charismatic species. This title is also available as Open Access on Cambridge Core.

Biodiversity in the Green Economy Alexandros Gasparatos, Katherine J. Willis, 2015-06-05 In the past decade the growing realization that biodiversity and human wellbeing are inextricably linked has led to the adoption of numerous environmental policies. The concept of the Green Economy has gained particular attention as an economic system where growth is possible within environmental limits. The preservation of ecosystem services and the halt of biodiversity loss are identified as key pillars of the Green Economy. Despite the concept's momentum there is still no clear understanding of how biodiversity fits within a Green Economy. In the current debate biodiversity is rarely acknowledged in economic sectors other than agriculture, forestry, fisheries, and tourism, and when it is acknowledged biodiversity and its conservation feature more as buzzwords than as concrete and tangible components of the Green Economy. This book aims to identify, understand, and offer pragmatic recommendations of how biodiversity conservation can become an agent of green economic development. This book establishes ways to assess biodiversity's contributions to the economy and to meaningfully integrate biodiversity concerns in green economy policies.

Wood Ant Ecology and Conservation Jenni A. Stockan, Elva J. H. Robinson, 2016-07-07 Wood ants play an ecologically dominant and conspicuous role in temperate boreal forests, making a keystone contribution to woodland ecosystem functions and processes. Wood ant taxonomy and global distributions set the scene for this text's exploration of wood ants as social insects, examining their flexible social structures, genetics, population ecology, and behaviour from nest mate recognition to task allocation. Wood ants' interactions with their environment and with other organisms are essential to their success; competition, predation, and mutualism are described and analysed. Bringing together the expertise of ecological researchers and conservation practitioners, this book provides practical and theoretical advice about sampling and monitoring these insects and outlines the requirements for effective conservation. This is an indispensable resource for wood ant researchers, entomologists, conservationists, and ecological consultants, as well as anyone interested in social insects, keystone species, and the management and conservation of forest ecosystems.

Seascape Ecology Simon J. Pittman, 2017-10-30 Seascape Ecology provides a comprehensive look at the state of the science in the application of landscape ecology to the seas and provides guidance for future research priorities. The first book devoted exclusively to this rapidly emerging and increasingly important discipline, it is comprised of contributions from researchers at the forefront of seascape ecology working around the world. It presents the principles, concepts, methodology, and techniques informing seascape ecology and reports on the latest developments in the application of the approach to marine ecology and management. A growing number of marine scientists, geographers, and marine managers are asking questions about the

marine environment that are best addressed with a landscape ecology perspective Seascape Ecology represents the first serious effort to fill the gap in the literature on the subject Key topics and features of interest include The origins and history of seascape ecology and various approaches to spatial patterning in the sea The links between seascape patterns and ecological processes with special attention paid to the roles played by seagrasses and salt marshes and animal movements through seascapes Human influences on seascape ecology includes models for assessing human seascape interactions A special epilogue in which three eminent scientists who have been instrumental in shaping the course of landscape ecology offer their insights and perspectives Seascape Ecology is a must read for researchers and professionals in an array of disciplines including marine biology environmental science geosciences marine and coastal management and environmental protection It is also an excellent supplementary text for university courses in those fields

Big, Bold and Blue James Fitzsimons, Geoff Wescott, 2016-07 The world's oceans cover about 70% of our planet To safeguard the delicate ecological and environmental functions of the oceans and their remarkable biodiversity networks of marine protected areas are being created In some of these areas human activity is restricted to non exploitative activities and in others it is managed in a sustainable way Australia is at the forefront of marine conservation with one of the largest systems of marine protected areas in the world Big Bold and Blue Lessons from Australia's Marine Protected Areas captures Australia's experience sharing important lessons from the Great Barrier Reef and many other extraordinary marine protected areas It presents real world examples leading academic research perspectives on government policy and information from indigenous sea country management non governmental organisations and commercial and recreational fishing sectors The lessons learnt during the rapid expansion of Australia's marine protected areas both positive and negative will aid and advise other nations in their own marine conservation efforts

Ecological-Economic Modelling for Biodiversity Conservation Martin Drechsler, 2020-03-26 Presents the state of the art of model based integration of ecology and economics in the field of biodiversity conservation

The Palgrave Handbook of Sustainability Robert Brinkmann, Sandra J. Garren, 2018-04-30 This book provides a comprehensive overview of the practice of sustainability through a diverse range of case studies spanning across varied fields and areas of expertise It provides a clear indication as to the contemporary state of sustainability in a time faced by issues such as global climate change challenges of environmental justice economic globalization and environmental contamination The Palgrave Handbook of Sustainability explores three broad themes Environmental Sustainability Social Sustainability and Economic Sustainability The authors critically explore these themes and provide insight into their linkages with one another to demonstrate the substantial efforts currently underway to address the sustainability of our planet This handbook is an important contribution to the best practises on sustainability drawn from many different examples across the fields of engineering geology anthropology sociology biology chemistry and religion

Biodiversity in Dead Wood Jogej N. Stokland, Juha Siitonen, Bengt Gunnar Jonsson, 2012-04-26 A comprehensive

overview of wood inhabiting fungi insects and vertebrates discussing habitat requirements along with strategies for maintaining biodiversity

Ecology and Conservation of Forest Birds Grzegorz Mikusiński, Jean-Michel Roberge, Robert J. Fuller, 2018-03-29 Ecology and Conservation of Forest Birds is a unique review of current understanding of the relationships between forest birds and their changing environments Large ecological changes are being driven by forest management climate change introduced pests and pathogens abiotic disturbances and overbrowsing Many forest bird species have suffered population declines with the situation being particularly severe for birds dependent on attributes such as dead wood old trees and structurally complex forests With a focus on the non tropical parts of the Northern Hemisphere the text addresses the fundamental evolutionary and ecological aspects of forest birds using original data analyses and synthesising reviews The characteristics of bird assemblages and their habitats in different European forest types are explored together with the macroecological patterns of bird diversity and conservation issues The book provides a valuable reference for ecologists ornithologists conservation professionals forest industry employees and those interested in birds and nature

Adopting the Melody of Appearance: An Mental Symphony within **Marine Protected Areas A Multidisciplinary Approach Ecology Biodiversity And Conservation**
