Extra-grammatical Morphology in English Elisa Mattiello, 2013-01-30 Extra grammatical morphology is a hitherto neglected area of research highly marginalised because of its irregularity and unpredictability Yet many neologisms in English are formed by means of extra grammatical mechanisms such as abbreviation blending and reduplication which therefore deserve both greater attention and more systematic study This book analyses such phenomena *International Perspectives on Inclusive Education* Simone Seitz, Petra Auer, Rosa Bellacicco, 2023-04-24 Internationale Entwicklungen und Impulse fordern dazu auf Bildungssysteme gerecht und inklusiv auszugestalten Das vorliegende Buch greift dies auf und fokussiert das häufig unscharf diskutierte Verhältnis zwischen inklusiver Bildung und Bildungsgerechtigkeit Durch die Zusammenstellung von aktuellen Forschungsergebnissen und theoretischen Beiträgen aus mehreren europäischen Ländern zu dem Thema schaffen die Autorinnen einen bergreifenden Diskussionsrahmen **Current Trends in Nigerian Pidgin**

English Akinmade T. Akande, Oladipo Salami, 2021-10-25 This book focuses on the structure and sociolinguistics of Nigerian Pidgin English Its major aim is to serve as a compendium which touches different major aspects of NPE as it has been observed that earlier works in this area have focused only on one aspect or the other It will offer a broad survey of the form and functions of Nigerian Pidgin NP in different domains The book promises to investigate the use of NP in such domains as

popular culture advertisement social media and online discussion fora One major strong point of this volume is the fact that it will direct attention to different fertile areas of NP by focusing inter alia on its social functions its morphology and syntax its regional varieties its possible use as a viable medium of instruction in school the changing attitudes of people towards its use the place of NP in relation to language planning and policy in Nigeria as well as sociolinguistic variation within NP The book will make a significant contribution to the existing literature on NP as unlike earlier studies in this area it will explore the grammatical sociolinguistic and perceptual aspects of the language By bringing together the expertise of renowned Nigerian and international scholars who have conducted research in this area the volume will be an essential resource for researchers graduate and undergraduate students interested not only in Nigerian Pidgin but also on contact linguistics

English in the Southern United States Stephen J. Nagle,Sara L. Sanders,2003-01-09 The English of the southern United States is possibly the most studied of any regional variety of any language because of its rich internal diversity its

distinctiveness among regional varieties in the United States its significance as a marker of regional identity and the general folkloric appeal of southern culture However most if not all books about Southern American English have been directed almost exclusively toward scholars already working in the field This 2003 volume written by a team of experts many of them internationally known provides a broad overview of the foundations of and research on language variation in the southern United States designed to invite inquiry and inquirers It explores historical and cultural elements iconic contemporary features and changes in progress Central themes issues and topics of scholarly investigation and debate figure prominently throughout the volume The extensive bibliography will facilitate continued research

European Encounters: Language, Culture and Identity Irén Annus, 2015-01-01 This volume is a collection of studies that analyze cultural encounters in Europe from multidisciplinary perspectives The book faithfully reflects the research conducted at various departments within the Faculty of Arts and Letters at the University of Szeged Hungary The idea for the collection was conceived during a dissemination meeting for a four year research project involving some of the authors known as Languages in a Network of European Excellence LINEE cofounded by the European Commission FP6 contract 28388 whose generous support also made the publication of this volume possible for which I would like to extend my gratitude here Our contemporary world has been persuasively described in a wealth of literature as an era of postmodernity characterized by a series of particular features including the development of digital culture and mediation an intricate interplay between globalization and localization the compression of time and space the rapid and constant movement of information and of people as well as the crossing of boundaries both in symbolic and concrete terms Lyotard Harvey and Appadurai Modernity among others It has been depicted as a transitory period marked by a series of turns linguistic cultural and pictorial visual e g by Rorty Jameson and Mitchell that have captured new mental frameworks for the comprehension of reality ies and resultant principles and processes of knowledge production also opening up avenues towards pluralism the politics of identity and difference and the centrality of issues concerning discourse power and ideology Calhoun Gupta and Ferguson Fairclough etc Having investigated various aspects of globalization Appadurai Disjuncture concluded that one way to understand this phenomenon is through the notion of cultural flows a concept that captures the speed and dynamism with which particular cultural forms and practices may travel and gain recognition outside of the local cultures within which they appear He proposed that these global cultural flows can best be explored through five imagined dimensions often in disjunction with each other ethnoscaples mediascaples technoscaples financescaples and ideoscaples Of these the studies in this volume focus primarily on ethnoscaples and ideoscaples the cultural flow that both the movement of people be they students tourists immigrants or artists and that of ideas from subcultures to teaching paradigms bring about and the representation of the various encounters these entail in language use cultural production and identity constructions This collection of studies tackles some of these issues as they appear in Europe particularly within the boundaries of Hungary where they have received particular attention after Hungary

joined the European Union in 2004 Hungary's accession introduced not only EU rules norms and expectations to the country but also encouraged the flow of people cultural exchange and cooperation within the EU in numerous ways such as research projects and academic exchange programs e.g. Tempus and Erasmus and cultural projects such as the European Capital of Culture award program In the implementation of the various programs and broad cooperation upon which a united Europe may emerge it is imperative to ensure communication thus language teaching and learning and the attainment of a particular level of proficiency have received particular attention within the EU All this in a broader context can be regarded as part of the problematization tied to the word European including the construction and meaning of a European identity particularly in relation to other such as national regional and local identities while not being blind to other powerful factors such as ethnicity religion and gender that also shape self identities in compelling ways The authors in this volume represent a multiplicity of academic fields from linguistics and literary criticism to cultural anthropology and cultural studies They share the characteristic of reaching across traditional methods and disciplines thus typically applying an interdisciplinary approach in their investigations all of which focus on the construction mediation outcome or impact of cultural encounters in a variety of contexts Except for one all of these studies explore particular aspects of contemporary issues and practices As reflected in the subtitle of the volume the papers have been organized around three major themes language use cultural interaction and identity construction The first set of studies investigates the significance of language in the postmodern age Globalization is often associated with tendencies towards standardization and homogenization e.g. Featherstone in the course of which English is becoming the global language and culture is becoming more and more dominated by American and Western European models Smith 14 In this context issues such as the way in which English is used in the global community the forms of power English may represent in particular local communities or the washback effect this global role may have on emerging techniques used in the English as a Foreign Language EFL classroom require further investigation **The Routledge**
