**Exchange and Power in Social Life** Peter Michael Blau, *The New Glutton or Epicure* Horace Fletcher, 2015-01-13 Example in this ebook It is now five years since the first section of this crude little announcement of a great physiological discovery was published and while the author has spent all the intervening years in unremitting study of the subject of which it treats with the heads of many of the great physiological laboratories of the world assisting him with their best facilities and information as to the reasons for things there is but small correction to make This does not imply that the last word upon the subject has been herein stated or that corrections may not be made as the study progresses but it means that as an honest description of an effort to get to understand the natural requirements in our own nutrition it is perhaps better put than the same author could now do that is if intended for the enlightenment of persons whose curiosity has not yet been excited or whose interest in their nutritive welfare is still young and inexperienced With regard to the statement that whatever has no taste is not nutritious copied from a high educational authority correction certainly must be made Pure proteid has no perceptible taste as measured by taste

bud appreciation any more than pure water has specific taste and yet who may not say that water tastes good when one is really thirsty Taste is a very subtle sense and is closely allied to feeling Things are often said to taste good because they feel good in the mouth or to the throat as they descend to the stomach Regarding also the advice to remove from the mouth refractory substance that the teeth and saliva cannot reduce to a condition to excite the Swallowing Impulse There is theoretical and actual nutriment in the cottony fibre of tough lobster or poor fish or lean pork and there is good reason to believe that a strong digestive apparatus can take care of such tough substance after a fashion and get nutriment out of it In the same way the hard woody fibre of old nuts is the identical material that was rich in juicy oils and proteid when the nuts were fresh but if swallowed in the toughened condition that age brings to nuts it is but slowly reduced in the stomach and intestines and only at enormous expense If putrifactive bacterial decomposition has to be resorted to to get rid of the stuff the process is then poisonous as well as difficult According to physiological authority which we must for the moment accept proteid is a vitally necessary material and we cannot afford to waste it Our life depends upon proteid to replace the waste of muscular tissue which occurs with every movement but when even good proteid is found by the mouth to be in a form that is too refractory for the teeth to handle it is poor policy to send it on to the toothless stomach and intestines for the accomplishment of the reduction If the mouth cannot handle what its guardian senses don't like it can spit it out and get rid of it immediately but if the stomach or intestines are afflicted with something that is harder than they can easily take care of they have to call in the assistance of bacterial scavengers whose method is poisonous decomposition and whose fee is putridity of odour penetrating the whole system and issuing at every pore making Cologne water a large commodity even in so called Polite Society To be continue in this ebook      **Pleasure Trove** Edward Verrall Lucas,1968      *The Lady of Pleasure* James Shirley,2014-03-06 One of Shirley's most well known works The Lady of Pleasure is an enjoyable and worthwhile read that will prove itself worthy of the time invested      Sold for Pleasure Jim Kent,1970      *The Man of Pleasure's Companion* ,1968      **Glutton For Love**, A.
