M. Gansinger, 2022-08-17. The Sufi tradition remains one of the most mysterious and least understood systems of self-realization. This book demystifies the practice of the sohbet, an ad hoc discourse, as the central instructional tool in the globally influential Naqshbandi Haqqani Order. It approaches the practice using categories of improvised music to establish a framework for analysis. Its ritualized formal structure is illustrated via selected talks of Shaykh Nazim Adil al Haqqani. He discloses the underlying and assumingly primary function to provoke prolonged states of raised awareness in listeners and condition their sympathetic nervous system. In an extensive discussion based on several years of field research in Cyprus, the book relates this intention to similar practices in other traditional knowledge systems by proposing

psychophysical interpretations based on psychology biochemistry neuroscience or quantum physics It will appeal to scholars and students of Sufism Islamic studies and comparative religion as well as those interested in performance studies and improvised music interpersonal communication and education
