Mangan,2012-05-04 This book discusses the way in which those born into the British empire were persuaded to accept it often with enthusiasm The study compares the perceptions of people at home in the dominions and in the colonies Across the diversity of imperial territories it explores themes such as the diverse nature of political socialisation the various agents and agencies of persuasion reaction to the experience of dominance by dominant and dominated the paradoxical impact of the missionary and the subversive role of some women It also considers the significant issues of colonial adaptation resistance and rejection and the post imperial consequences of imperialism **Literary World; Choice Readings from the Best New Books, with Critical Reviews** ,1889 **Science, Democracy, and the American University** Andrew Jewett,2014-05-01 This book

reinterprets the rise of the natural and social sciences as sources of political authority in modern America Andrew Jewett demonstrates the remarkable persistence of a belief that the scientific enterprise carried with it a set of ethical values capable of grounding a democratic culture a political function widely assigned to religion The book traces the shifting formulations of this belief from the creation of the research universities in the Civil War era to the early Cold War years It examines hundreds of leading scholars who viewed science not merely as a source of technical knowledge but also as a resource for fostering cultural change This vision generated surprisingly nuanced portraits of science in the years before the military industrial complex and has much to teach us today about the relationship between science and democracy
