Pierre Bourdieu, Organization, and Management Ahu Tatli, Mustafa Ozbilgin, Mine Karatas-Ozkan, 2015-04-17 Pierre Bourdieu the French sociologist philosopher and anthropologist has been widely studied and analyzed in academic circles particularly in sociology where his

ideas about power relations in social life helped to define the contemporary field. While many other sociological theories and figures have been extensively discussed and analyzed within the contexts of organization studies and management, Bourdieu's ideas have until recently been largely ignored. Offering an authoritative evaluation of Bourdieu's work, this book provides readers with conceptual frameworks, empirical examples, and methodological considerations for advancing theory and research in management and organization studies. This book presents an in-depth review of the relevance of Bourdieu's social theory for organization and management studies, outlining the key aspects of Bourdieu's approach and situating his work in its historical and intellectual context of the time. An outline of the treatment of Bourdieuan theory by management and organization scholars and a critique of the selective reception of his work are offered. The first edited collection to explore the benefits of Bourdieuan sociology for a management audience, this book is relevant for theory, research, and practice and will appeal to an international scholarly audience of academics and research students. *Dark Sides of Organizational Life* H.

Cenk Sözen, H. Nejat Basım, 2023-04-28 Exploring the darkest side of organizations may have a potential to change our previous assumptions about business life. Scholars both in management and organizational research fields have shown interest in the bright side of behavioral life and have looked for the ways to create a positive organizational climate and assumed a positive relation between happiness of employees and productivity. These main assumptions of the Human Relations School have dominated the scientific inquiry on organizational behavior. However, the dark side of organizational life may have more explanatory power than the bright side. Hostility, jealousy, envy, rivalry, gossip, problematic personalities, dislike, revenge, and social exclusion are the realities of business life. A manager may devote most of their time to cope with conflicts, deviant behaviors, ambitious individuals, gossips, and dysfunctional rivalry among employees. It is evident that negative events and interactions among employees cost more time and energy for a manager than the positive side of organizational life. This edited collection specifically focuses on these issues and will be of interest to researchers, academics, and advanced students in the fields of management, organizational studies, and behavior, sociology, social psychology, and human resource management. Professional Issues in Primary Care Nursing Carol Cox, Marie Hill, 2010-01-05 As both practice and walk in centre nurses continue to adapt to the constant on-going change demanded by both the public and the government paymasters, they will face ever-growing self-questioning about their role, responsibilities, and their need to remain competent, knowledgeable, and safe practitioners. From the foreword by Professor Dame Betty Kershaw DBE FRCN Education Advisor, The Royal College of Nursing, President of the Scholarship Society for Nurses and Midwives. This book enables nurses to get to grips with the professional issues that affect their practice in primary care. It is structured around the RCN domains of practice and considers a wide variety of issues including health promotion, reflective practice, and leadership. Part One sets the scene for the domains of practice which follow and considers the unique aspects of practice and walk in centre nursing. Part Two considers practical aspects of each of the RCN domains of practice in turn and is centred around nurse-patient

relationships Provides greater understanding of issues that affect the nature of practice Addresses the considerable changes in practice nursing and walk in centres Evidence based but also contains personal experiences Suitable for nurses undertaking community specialist practitioner degree courses qualified practice nurses and walk in centre staff

Management and Neoliberalism Alexander Styhre, 2014-04-16 After the financial collapse of 2008 and the bailing out of banks in the US and the UK the long term viability of the neoliberal doctrine has come under new scrutiny The elimination of regulatory control the financialization of the economy including the growth of increasingly complex financial innovations and the dominance of a rentier class have all been subject to thorough criticism Despite the unexpected meltdown of the financial system and the substantial costs for restoring the finance industry critics contend that the same decision makers remain in place and few substantial changes to regulatory control have been made Even though neoliberal thinking strongly stresses the role of the market and market based transactions the organization theory and management literature has been marginally concerned with neoliberalism as a political agenda and economic policy This book examines the consequences of neoliberalism for management thinking and management practice Managerial practices in organizations are fundamentally affected by a political agenda emphasizing competition and innovation Concepts such as auditing corporate social responsibility shareholder value and boundariless careers are some examples of managerial terms and frameworks that are inextricably entangled with the neoliberal agenda This book introduces the literature on neoliberalism its history and controversies and demonstrates where neoliberal thinking has served to rearticulate managerial practice including in the areas of corporate governance human resource management and regulatory control of organizations

Untold Stories in Organizations Michal Izak, Linda Hitchin, David Anderson, 2014-11-13 The field of organizational storytelling research is productive vibrant and diverse Over three decades we have come to understand how organizations are not only full of stories but also how stories are actively making sustaining and changing organizations This edited collection contributes to this body of work by paying specific attention to stories that are neglected edited out unintentionally omitted or deliberately left silent Despite the fact that such stories are not voiced they have a role to play in organizational analysis The chapters in this volume variously explore how certain realities become excluded or silenced The stories that remain below the audible range in organizations offer researchers an access to study political practices which marginalise certain organisational realities whilst promoting others This volume offers a further contribution by paying heed to silence and the processes of silencing These silences influence the choice of issues on organisational agendas the choice of audience s to which these discourses are addressed and the ways of addressing them In exploring these relatively understudied terrains Untold Stories in Organizations comprises an important contribution to the organizational storytelling space opening paths for new trajectories in storytelling research **The Strategically Networked Organization** Hanna

Lehtimäki, 2016-12-08 The Strategically Networked Organization shows top and upper middle management how cultivating an understanding of intra firm social relations can help them to build unique strategic advantage and make use of the day to day knowledge that emerges in the social connections and interactions within an organization *The Ethics of Sustainability*

in *Management* Kenneth Mølberg Jørgensen, 2023-12-13 Organizational storytelling has been taught for many years in many different places as part of organizational development organizational change organizational learning and business ethics There has not been any comprehensive framework that addresses sustainability in organizations and so this book develops a new ethics of sustainability for management and organizations A terrestrial ethics of storymaking is proposed which responds to Latour's claim that the Terrestrial has become a new decisive political actor in politics The Terrestrial is born from Gaia a metaphor for a new look on life on Earth Gaia situates life in the thin layer of matter that is the surface of the Earth It entails the view that nature is a process that humans are part of Storymaking is constructed from Arendt's political philosophy which is rooted ontologically in the principle of natality rebirth of life The term storymaking is developed from Arendt's understanding of storytelling as political action to emphasize not only that stories are spatial embodied and material practices that are tied to a specific time and space but also that technology is an important dimension in making stories Stories are thus human practices that apart from meaning making and politics involve the use and manipulation of material and objects and which are crucial for how a human world is shaped This human world is furthermore shaped by the rhythms of life embedded in the complex landscapes that humans move through Storymaking is developed through rethinking the links between the central categories of labor work action and thinking in Arendt's writings Implications for business ethics are drawn out and a comprehensive ethics framework is constructed that connects the biological and physical with the social economic and political regarding how organizations work Finally a storymaking philosophy of management is constructed making this book especially relevant to researchers academics managers and students in the fields of business ethics management studies leadership organizational studies and international business
