The Submariner's Dictionary Or Submariner's Compendium of Terms & Tar's Handbook of Naval Verbiage and Retired Guy's Re-familiarization Manual Ron Martini, 2005 Submariners are a tight knit group of men bound together by training and experience and with a language all their own That language is perhaps a little vulgar but never intentionally demeaning and a little irreverent but still worldly This work is an attempt to preserve and explain some of these curious guys who so proudly wear a shiny metal pin that looks like a strange pair of fish on their left breast This process of accumulating this new language begins in Boot Camp and is added to with every change of duty station the sailor undergoes It is heard aboard the boats and unknowingly by family members who can't understand terms like head deck and overhead and who think SOS is a distress signal

The Modernisation of the Republic of Korea Navy Ian Bowers, 2018-08-11 This book sheds light on one of the most under studied but powerful navies in the world Using a multifaceted approach it examines how the Republic of Korea Navy ROKN has sought to transform itself from a coastal naval force focused solely on deterring North Korea to a navy capable of operating in the blue waters of East Asia and beyond The project argues that peninsular and regional security dynamics technological developments the US South Korea alliance and internal politics combine to inform and shape ROKN modernisation

The Decline of European Naval Forces Jeremy Stohs, 2018-04-15 The Decline of European Naval Forces aims to provide insight into the evolution of Europe's naval forces since the end of the Cold War To illuminate the drastic changes many European navies have undergone over the last twenty five years Jeremy Stohs analyzes the defense policies and naval strategies of eleven European states as well as the evolution deployment and capabilities of their respective naval forces In these case studies the development of Europe's most important naval forces is assessed per

the respective strategic framework in which they have operated over the past two decades. St. Hs describes not only the general composition of each force but also the range of their capabilities and their important technical features. His study shows that since the end of the Cold War all but a few European navies have significantly decreased in size and thus have ceded important capabilities along the way. Based on the understanding of sea power as a prerequisite for political influence and economic health, the consequences of the geopolitical shift toward the Asian Pacific region and most importantly the general decline of Europe's traditional naval capabilities, the author concludes that the ability of European states to influence events near and abroad by means of their naval forces has atrophied and will continue to be called into question in the future.
