The Abyssinian Art of Louis Agassiz Fuertes in the Field Museum Paul Johnsgard, 2020 This book documents the paintings and drawings executed by Louis Agassiz Fuertes during the Field Museum of Natural History's seven month expedition to Ethiopia Abyssinia in 1926-27. During that time Fuertes completed 70 field watercolors that illustrate 55 species of birds and four species of mammals. He also executed 34 pencil drawings which illustrate 13 species of mammals and 11 species of birds plus numerous miscellaneous sketches and small watercolors. This book identifies and describes the biology of all 69 species of birds and mammals illustrated by Fuertes and includes 32 color reproductions of Fuertes's watercolors that were published as a limited edition album in 1930 by the Field Museum. The 60,000 word text provides brief summaries of all these species' ecology, behavior and reproductive biology as well as information about their current populations and conservation status. A review of Fuertes's life, his influence on modern bird and wildlife art and his participation in and artistic contributions to the Field Museum's Abyssinian Expedition is also included as well as more than 250 bibliographic citations.

Tamu Nature Guides Elizabeth Cary Mungall, 2007 Exotic animals range in appearance from truly striking to seemingly ordinary and they live in wildlife preserves, on farms, in parks and even in the wilderness across the United States. In this book Elizabeth Cary Mungall provides ample information for anyone from park visitor and zoo goer to rancher and wildlife biologist who wants to identify and learn more about exotic wildlife in the United States. Richard D. Estes, author of *The Safari Companion*, says that for everyone interested in exotic hoofed stock, *Exotic Animal Field Guide* is a well-written and beautifully illustrated book that fills a vacant niche. Indeed, the main portion of the book contains fully illustrated species accounts of eighty different kinds of hoofed animals with native range maps and information about food habits, habitat, temperament, breeding and birth seasons, and fencing needs. A list of exotics-related organizations and a reference section round out the text. Photographs of each species make the book both attractive and useful as a field tool. In a chapter on photographing exotics, Christian Mungall shows readers how to take their own great pictures of these animals. Clearly, as James G. Teer of the Department of Wildlife and Fisheries Sciences at Texas A M University states, this is much more than a field guide. Elizabeth Cary Mungall's book is a long-awaited repository and data source on the ecology, technology and management of more than 80 species of non-native hoofed animals. Anyone with exotics on his or her property will require *Exotic Animal Field Guide*.
