World Economic Outlook, October 2016 International Monetary Fund. Research Dept., 2016-10-04 According to the October 2016 World Economic Outlook global growth is projected to slow to 3.1 percent in 2016 before recovering to 3.4 percent in 2017 The forecast revised down by 0.1 percentage point for 2016 and 2017 relative to April's report reflects a more subdued outlook for advanced economies following the June U.K. vote in favor of leaving the European Union Brexit and weaker than expected growth in the United States These developments have put further downward pressure on global interest rates as monetary policy is now expected to remain accommodative for longer Although the market reaction to the Brexit shock was reassuringly orderly the ultimate impact remains very unclear as the fate of institutional and trade arrangements between the United Kingdom and the European Union is uncertain Financial market sentiment toward emerging market economies has improved with expectations of lower interest rates in advanced economies reduced concern about China's near term prospects following policy support to growth and some firming of commodity prices But prospects differ sharply across countries and regions with emerging Asia in general and India in particular showing robust growth and sub-Saharan Africa experiencing a sharp slowdown In advanced economies a subdued outlook subject to sizable uncertainty and downside risks may fuel further political discontent with anti integration policy platforms gaining more traction Several emerging market and developing economies still face daunting policy challenges in adjusting to weaker commodity prices These worrisome prospects make the need for a broad based policy response to raise growth and manage vulnerabilities

House,1963 *Belastingontwijking en de EG-Verdragvrijheden* Dennis Weber,2005-01-01 This unique book investigates the extent tot which a taxpayer may invoke the freedom of movement within the Community in order to avoid national direct taxes A Member State s right to protect its taxing authority and tax jurisdiction may collide with a Union citizen s right to free movement under Community law The author shows what at the national level is viewed as abuse may often be viewed from an EC law perspective as invoking the Treaty freedoms As his starting point the author describes relevant Community law as it stands at present whereby Member States are exclusively authorized to determine the types tax bases rates and procedural aspects of direct taxes He goes on to examine the

possibilities offered by primary EC law to cross border taxpayers who seek to avoid tax basing his presentation on an in depth analysis of the tax and non tax case law of the Court of Justice of the European Communities Among the issues raised in the course of the analysis are the following applicability of each of the freedoms of the citizen of goods of workers of establishment of services and of capital tests entailed by Community law the economic activity test the artificiality test and the substance test the extent to which holding and letterbox companies may invoke the freedom of movement and the fiscal cohesion justification The author describes the implicit concept of avoidance that the Court apparently uses by examining its tax and non tax decisions in avoidance like cases thus offering a valuable discussion of whether the anti abuse doctrine development by the Court is a principle of Community law In its thorough investigation of a major current manifestation of the emblematic conflict between state taxing authority and personal freedom this thoughtful and well researched analysis will be of great value to tax professionals officials and academics not only on Europe but wherever this fundamental problem in tax law applies
