ethnomusicology community psychology and health promotion Where Music Helps describes the emerging movement that has been labelled Community Music Therapy and it presents ethnographically informed case studies of eight music projects localized in England Israel Norway and South Africa The various chapters of the book portray music s help in action within a broad range of contexts with individuals groups and communities all of whom have been challenged by illness or disability social and cultural disadvantage or injustice Music and musicing has helped these people find their voice literally and metaphorically to be welcomed and to welcome to be accepted and to accept to be together in different and better ways to project alternative messages about themselves or their community and to connect with others beyond their immediate environment The overriding theme that is explored is how music comes to afford things in concert with its environments which may suggest a way of accounting for the role of music in music therapy without reducing music to a secondary role in relation to the therapeutic that is being just a symbol of psychological states a stimulus or a text reflecting socio cultural content
