Poverty And Proficiency: The Cost Of And Demand For Local Public Education (A Textbook In Education Finance) John Yinger, 2020-02-27 This book covers a wide range of topics in education finance It is designed to introduce the literature on education finance to scholars and prospective scholars and can be used as a textbook for a graduate level education finance class The topics in the book include the incidence of the property tax as a source of revenue for elementary and secondary education how much more it costs to reach a state s education targets in a high poverty school district than in a rich district the design of state education aid programs the impact of school quality on house values the cost implications of school district consolidations and the impact of state aid on school infrastructure **Choosing Homes, Choosing Schools**

Annette Lareau, Kimberly Goyette, 2014-03-31 A series of policy shifts over the past decade promises to change how Americans decide where to send their children to school In theory the boom in standardized test scores and charter schools will allow parents to evaluate their assigned neighborhood school or move in search of a better option But what kind of data do parents actually use while choosing schools Are there differences among suburban and urban families How do parents choices influence school and residential segregation in America *Choosing Homes Choosing Schools* presents a breakthrough analysis of the new era of school choice and what it portends for American neighborhoods The distinguished contributors to *Choosing Homes Choosing Schools* investigate the complex relationship between education neighborhood social networks and larger patterns of inequality Paul Jargowsky reviews recent trends in segregation by race and class His analysis shows that segregation between blacks and whites has declined since 1970 but remains extremely high Moreover white families with children are less likely than childless whites to live in neighborhoods with more minority residents In her chapter

Annette Lareau draws on interviews with parents in three suburban neighborhoods to analyze school choice decisions. Surprisingly she finds that middle and upper class parents do not rely on active research such as school tours or test scores. Instead most simply trust advice from friends and other people in their network. Their decision making process was largely informal and passive. Eliot Weinginer complements this research when he draws from his data on urban parents. He finds that these families worry endlessly about the selection of a school and that parents of all backgrounds actively consider alternatives including charter schools. Middle and upper class parents relied more on federally mandated report cards, district websites and online forums while working class parents use network contacts to gain information on school quality. Little previous research has explored what role school concerns play in the preferences of white and minority parents for particular neighborhoods. Featuring innovative work from more than a dozen scholars, *Choosing Homes Choosing Schools* adroitly addresses this gap and provides a firmer understanding of how Americans choose where to live and send their children to school.

Handbook of Education Policy Research Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10 Co published by Routledge for the American Educational Research Association (AERA). Educational policy continues to be of major concern. Policy debates about economic growth and national competitiveness for example commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA sponsored Handbook. Organized into

seven sections the Handbook focuses on 1 disciplinary foundations of educational policy 2 methodological perspectives 3 the policy process 4 resources management and organization 5 teaching and learning policy 6 actors and institutions and 7 education access and differentiation Drawing from multiple disciplines the Handbook s over one hundred authors address three central questions What policy issues and questions have oriented current policy research What research strategies and methods have proven most fruitful And what issues questions and methods will drive future policy research Topics such as early childhood education school choice access to higher education teacher accountability and testing and measurement cut across the 63 chapters in the volume The politics surrounding these and other issues are objectively analyzed by authors and commentators Each of the seven sections concludes with two commentaries by leading scholars in the field The first considers the current state of policy design and the second addresses the current state of policy research This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research For more information on the American Educational Research Association please visit <http://www.aera.net>

The Impact and Transformation of Education Policy in China Alexander W. Wiseman, Tiedan Huang, 2011-12-08 Examines the transformation of education policy in China with an emphasis on transformations in the post 1978 period This title also emphasises on policy change and its subsequent impact on different aspects of education at various levels of educational institutions particularly in areas of educational financing and curriculum reform

Money, Mandates, and Local Control in American Public Education Bryan Shelly, 2011-07-08 Pointing to the disparities between wealthy and impoverished school districts in areas where revenue depends primarily upon local taxes reformers repeatedly call for the centralization of school funding Their proposals meet resistance from citizens elected officials and school administrators who fear the loss of local autonomy Bryan Shelly finds however that local autonomy has already been compromised by federal and state governments which exercise a tremendous amount of control over public education despite their small contribution to a school system s funding This disproportionate relationship between funding and control allows state and federal officials to pass education policy yet excuses them from supplying adequate funding for new programs The resulting unfunded and underfunded mandates and regulations Shelly insists are the true cause of the loss of community control over public education Shelly outlines the effects of the most infamous of underfunded federal mandates the No Child Left Behind Act of 2001 NCLB and explores why schools implemented it despite its unpopularity and out of pocket costs Shelly s findings hold significant implications for school finance reform NCLB and the future of intergovernmental relations

Recent Advancements in Education Finance and Policy Thomas Downes, Kieran M. Killeen, 2022-10-01 The past decade has seen a steady flow of important and innovative papers documenting the short and long term effects of finance reforms and the heterogeneity of the effects of reforms exemplified by papers like Jackson Johnson Persico 2016 Lafortune Rothstein Schanzenbach 2018 Hyman 2017 and Candelaria and Shores 2019 Those papers have reinvigorated research on the effects of finance reforms while raising important questions about how to best design a finance system and generate necessary revenues The papers mentioned above along with other papers too numerous to mention have taken advantage of better data and better methods to address long standing questions and generate provocative new answers Since the landscape has

changed quickly policy makers and prospective researchers require a summary of the current state of the research on the effects of school finance reforms Answers are also needed to such questions as To what extent are lessons from the Great Recession applicable to the Covid 19 induced crisis For example how will states allocate cuts in grants and will those cuts undo state progress in equalizing educational access Are there strategies for allocating resources that best preserve student learning How do financing systems need to be modified to accommodate greater use of online education How should school finance systems be designed to provide equal access or at a minimum adequate access to students with special needs Why is there significant heterogeneity in the results of different finance reforms What have been the effects of recent state efforts to reduce the role of the property tax in financing K 12 education How should finance systems be designed to more effectively close persistent achievement gaps How if at all should states integrate the financing of preschool education with the financing of elementary and secondary education To help prepare the next generation of researchers and policy makers in the realm of school finance this volume includes papers that summarize the current state of research on the questions above as well as other pressing questions in education finance and policy The book aims to bridge a space between comprehensive textbooks and journal articles in the field of education finance and policy There are two main target audiences The book is meant to serve professionals like school district administrators and education policy practitioners that desire a contemporary update to their previous study of education finance and policy issues These audiences often have limited access to peer reviewed journals and knowledge of pertinent government and related policy reports in the field The book is also meant to serve students and faculty from programs in public administration public policy community development and applied economics education administration educational leadership and policy studies that are studying content related to education policy the economics of education state and local public finance and taxation Some upper level undergraduate students may also benefit from this resource

Good Governance in Asia Linda Chelan Li, 2016-03-22 The international aid community has advocated governance reforms as a necessary complement to economic aid to developing countries The resultant Good Governance Agenda has been criticised for its ahistorical bias The empirical case studies reported in this book further illustrate the limitations by showing the complex logics of governance reforms and their relations with development in the Asian context The analysis highlights the importance of taking full notice of the Asian reform experiences in the ongoing reflection over the global institutional and development agenda The message is not to deny the need for governance reforms or the utility of international learning and sharing of experiences Global development will benefit however from a better understanding of the linkages between governance reforms and the diverse historical conditions they are embedded in both developing or the advanced economies This book was published as a special issue of *Journal of Contemporary Asia*

The Rising State Bonnie C. Fusarelli, Bruce S. Cooper, 2009-02-02 State and national policymakers are increasingly important in shaping the nature scope and direction of education initiatives resulting in the erosion of local control The Rising State

weaves together leading national experts perspectives that focus on equity comparative differences in state educational policies agenda setting and the nationalization of education policy The contributors provide policymakers teachers administrators parents and the general public with an opportunity and means to understand the success and failure of the growth of state power and centralization of control of education in the United States and offer forecasts for future developments *The Oxford Handbook of Urban Economics and Planning* Nancy Brooks,Kieran Donaghy,Gerrit-Jan Knaap,2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics Schoolhouses, Courthouses, and Statehouses Eric A. Hanushek,Alfred A. Lindseth,2020-10-06 Improving public schools through performance based funding Spurred by court rulings requiring states to increase public school funding the United States now spends more per student on K 12 education than almost any other country Yet American students still achieve less than their foreign counterparts their performance has been flat for decades millions of them are failing and poor and minority students remain far behind their more advantaged peers In this book Eric Hanushek and Alfred Lindseth trace the history of reform efforts and conclude that the principal focus of both courts and legislatures on ever increasing funding has done little to improve student achievement Instead Hanushek and Lindseth propose a new approach a performance based system that directly links funding to success in raising student achievement This system would empower and motivate educators to make better more cost effective decisions about how to run their schools ultimately leading to improved student performance Hanushek and Lindseth have been important participants in the school funding debate for three decades Here they draw on their experience as well as the best available research and data to show why improving schools will require overhauling the way financing incentives and accountability work in public education *Handbook of Education Politics and Policy* Bruce S. Cooper,James G. Cibulka,Lance D. Fusarelli,2008-06-30
