Librarians as Learning Specialists Allison Zmuda, Violet H. Harada, 2008-06-30 Zmuda and Harada explore the increasing number of job descriptions in schools for learning specialists with the accompanying difficulty in effectively leveraging these roles to positively affect student learning School librarians have been one of these learning specialists for decades The ranks have expanded in recent years to include many other content area specialists Grant Wiggins foreword emphasizes the relevance of learning specialists is grounded in their ability to deliver results on mission critical measures This title incorporates quotations exemplars and findings from experts in both mainstream and librarian focused education literature in an inclusive approach making the text accessible

and credible for any leader charged with improving the system's ability for improved student achievement. There are an increasing number of job descriptions in schools for learning specialists: certified teachers with specialized areas of expertise whose job it is to improve student performance. While these positions are attractive ideas in theory, there are real challenges in effectively leveraging such roles to positively affect student learning. School librarians have been one of these learning specialists for decades. The ranks have expanded in recent years to include reading specialists, literacy coaches, writing coaches, technology specialists, mathematics specialists, science specialists, and teachers of English Language Learners. References included throughout the book incorporate quotations, exemplars, and findings from experts in both mainstream and librarian-focused education literature. This inclusive approach makes the text accessible and credible for any leader charged with improving the system's ability for improved student achievement. Grant Wiggins' foreword emphasizes the premise that the relevance of learning specialists is grounded in their ability to deliver results on mission-critical measures.

Helping Teachers Teach Philip M. Turner, 1985. Grounded in a commitment to the school library media specialist's vital role in the design, implementation, and evaluation of classroom instruction, Turner's book explores why the SLMS must get involved and it provides the tools for doing so. The book includes the procedures for an information skills needs assessment, cognitive-based instructional enterprises, information on new learner analysis instruments, and more. **Resources in**

Education, 2001-04. *Next Generation Course Redesign* Philip M. Turner, Ronald S. Carriveau, 2010. There is widespread recognition that large enrollment introductory classes are a significant problem. Lack of engagement, incongruous learning styles, and teaching methods, and high failure/dropout rates are some of the symptoms. The University of North Texas has developed and promulgated a process for redesigning these classes that brings to bear the creativity of the faculty, resulting in higher-level student learning without increasing instructional costs. This groundbreaking book provides the reader with a theoretical foundation for course redesign that employs assessment-driven, experiential learning and tools and examples to bring all or part of the process to their campus. Back cover. *School Libraries 3.0* Rebecca P. Butler, 2015-06-18. This textbook for school library administration courses is written by a professor who has taught this course at least once a year for the past twenty years. Technology is interwoven throughout the book and not listed as a separate chapter or book section. This is because the school librarian of today and certainly the school librarian of tomorrow is working in an environment of web resources, multimedia, mixed methods, and varying programs and services. Major chapters cover the various roles of the school librarian, curricular standards and guidelines, policies and procedures, budgeting, facilities, personnel services, programming, ethics, advocacy, and evaluation. Sample policies, procedures, and plans make this book valuable to both new and experienced school librarians. **Educational Media and Technology Yearbook** Michael Orey, V. J. McClendon, Robert Maribe Branch, 2009-05-28. The Educational Media and Technology Yearbook has become a standard reference in many libraries and professional collections. Examined in relation to its companion volumes of the past, it provides a valuable historical record of

current ideas and developments in the field Part I Trends and Issues presents an array of chapters that develop some of the current themes listed above in addition to others Part II Library and Information Science concentrates upon chapters of special relevance to K 12 education library science education school learning resources and various types of library and media centers school public and academic among others In Part III Leadership Profiles authors provide biographical sketches of the careers of instructional technology leaders Part IV Organizations and Associations in North America and Part V Graduate Programs in North America are respectively directories of instructional technology related organizations and institutions of higher learning offering degrees in related fields Finally Part VI the Bibliography presents an annotated listing of selected current publications related to the field For a number of years we have worked together as editors and the sixth with Dr Michael Orey as the senior editor Last year as the senior editor Orey decided to try and come up with a list of the top programs rather than just the list of all the programs This has proven to be problematic First of all bias exists when we are rating a field in which our program is within those to be rated
