world's population which will reach ten billion by the year 2050. Innovative and technological advancements that enhance all aspects of food production will arise from basic fundamental research. Besides food, animals by products have found many applications in the fields of pharmaceuticals, cosmetics and household and industrial products. Hence the need to ameliorate the productivity, reproductivity, growth, performance and disease resistance in animals has created a worldwide interest in gaining a deeper understanding of animal biology, biotechnology and genomics and proteomics. The present volume thoroughly discusses the omics studies in domestic and non domestic animals and their role in mitigation of various challenges ahead. The volume thus focuses on i Omics, genomics, proteomics, transcriptomics, metabolonomics, technologies in identifying, characterizing biodiversity ii Role of molecular techniques for improvement of domestic and non domestic organisms iii Animal and alternative model systems using stem cells, tissue engineering, cell free systems, 3D platforms etc for studying life phenomena iv Genetically modified organisms as factories for the products.
