Once upon a time many years ago a man named Donald Mech courageously stepped into an exciting intriguing career the ancient art of beekeeping He actually made a living with honeybees Read the story of how Mech Apiaries honey traveled everywhere from Pike Place Market in Seattle all across the land And who could better tell this amazing story than his wife and helpmate of fifty five years Doris who was there through it all in real life by faith and a spin **The Family Expositor; Or, A Paraphrase and Version of the New Testament** Philip Doddridge,Job Orton,1831 **Creation and New Creation** Sean M McDonough,2016-04-01 In keeping with the Scriptural witness and the theological heritage this remarkable book examines the doctrine of creation alongside new creation The connection between the two creation and new creation has drawn renewed attention in the last several decades but the burden of Sean McDonough s argument is that this emphasis on creation and new creation has been a feature of the doctrine since the beginning whether in the eschatological reading of Genesis 1 that predominated at least until early modern times or the intertwining of the narratives of creation and redemption in thinkers from Irenaeus to Barth Whilst covering the traditional elements of the doctrine McDonough treats the important subject with a special emphasis on how these unfold in the story of what Gunton has called God s creation project

Forest Governance Jessica Stubenrauch,Felix Ekardt,Katharina Hagemann,Beatrice Garske,2022-04-22 This book analyses and develops overarching concepts for forest policy and forest governance and includes a detailed investigation into the historical discussion on forests It examines opportunities and limits for negative emissions in a sector that like peatlands appears significantly less ambivalent compared to highly technical large scale forms of climate geoengineering The analysis shows that the binding climate and biodiversity targets under international law are much more ambitious than most people assume Measured against that the volume critically reviews the potentials of afforestation and reforestation for climate mitigation which is often presented as the new saviour to fulfil the commitments of the Paris Agreement and to reach climate neutrality in the future It becomes clear that ultimately only biodiverse and thus resilient forests can function as a carbon sink in the long term The volume shows that the existing European and international forest governance approaches fail to comply with these targets and insights Furthermore the book develops a bundle of policy measures Quantity governance systems for livestock farming fossil fuels and similar drivers of deforestations represent the most important approach They

are most effective when not directly targeting forests due to their heterogeneity but central damaging factors With regard to the dominant regulatory and subsidy based governance for forests we show that it remains necessary to supplement these quantity governance systems with certain easily graspable and thus controllable regulatory and subsidy regulations such as a regulatory protection of old growth forests with almost no exceptions extension of the livestock to land ratio established in organic farming to all farming far reaching restriction of bioenergy use to certain residues flanked by import bans and a national and international complete conversion of all agricultural and forest subsidies to public money for public services to promote nature conservation and afforestation in addition to the quantity control systems Lost in Transition Aaron D. Baptized Imagination Kerry Dearborn, 2016-04-15 The imagination has been called the principal organ for knowing and responding to disclosures of transcendent truth This book probes the theological sources of the imagination which make it a vital tool for knowing and responding to such disclosures Kerry Dearborn approaches areas of theology and imagination through a focus on the nineteenth century theologian and writer George MacDonald MacDonald can be seen as an icon whose life and work open a window to the intersection of word flesh and image He communicated the gospel through narrative and image rich forms which honour truth and address the intellectual imaginative spiritual and emotional needs of his readers MacDonald was also able to speak prophetically in a number of areas of contemporary concern such as the nature of suffering aging and death environmental degradation moral imagination and gender issues Dearborn explores influences which shaped him along with the wisdom he has offered in the formation of significant Christian writers in both the nineteenth and twentieth centuries Authors such as C S Lewis G K Chesterton Dorothy Sayers J R R Tolkien W H Auden Frederick Buechner and others attribute to MacDonald key paradigm shifts and insights in their own lives A study of MacDonald does not offer a formulaic approach to theology and the imagination but the possibility of gleaning from his rich harvest relevant nourishment for our own day It also provides a context in which to assess potential weaknesses in imaginative approaches to theology

_____ *OR, A DISCOURSE CONCERNING THE HOLY SPIRIT* John Flavel, 2016-07-27. A critical work into the working and theology of the most mysterious person of the Holy Trinity, the Holy Spirit. Many times Christians recognize but do not focus on the Holy Spirit even though He is the most active person of the Godhead in our world today. This work goes to correct that and delves into Scripture to reveal to us how He works and what He is like so that we can properly revere Him as Almighty God.
