The instruments that are used in this book to chart this path include 1 the findings of scripture scholars regarding the Genesis creation narratives 2 the basic biology of evolution and genetics 3 the basics of the sciences of complexity 4 the philosophy and theology behind the positions people take with respect to evolution and religious faith 5 the thinking of Pierre Teilhard de Chardin on evolution and God and 6 the evolutionary theology of John Haught. In the remote wilderness there are two clearwater streams that at close range apparently flow from different mountaintops but which when viewed from farther away can be seen to flow from two ridges of the same mountain. Somewhere in the wilds the two streams join become confluent. The purpose of this book is to find this confluence.

Redundant God? Christian Faith in the Light of Evolution David de Pomerai, 2020-11-24. Does evolution make faith superfluous? Part One of this book looks across the whole spectrum of biology from molecules to ecosystems to human societies and at the fossil history of life on earth concluding that evolution is the only explanatory concept that makes sense of it all. Doesn't this demolish the core Christian claim that God created the entire universe? Part Two explores whether God might instead embrace that universe with love and compassion without micromanaging or interfering. Jesus bears witness to such a God in his kingdom teaching calling Christians to follow his example of humility serving others and valuing what the world considers unimportant. This suggests paths of repentance and restraint that are urgently needed in a world facing rapid climate change and likely mass extinction.

God, Humanity and the Cosmos - 3rd Edition Christopher Southgate, 2011-12-15. *Christians and Evolution* R J Berry, 2014-11-19. The debate surrounding creation and evolution divides Christians particularly evangelicals. It has been a stumbling block for young Christians and a point of contention for the new Atheists. Professor R J Berry assembles a wide range of distinguished contributors all convinced committed and orthodox Christian believers each of whom has undertaken a conceptual journey based on sound science and careful theology from a creationist position to one in which God's creation and the processes of evolution are properly and credibly integrated. *Christians and Evolution* is a luminous volume that offers a pathway for doubters sceptics and conservative Christians to embrace the overall scientific consensus of the evolutionary approach while holding solidly and without reservation to the doctrines of God's creation and God's omnipotence. This text is a must read for anyone interested in the creation v evolution debate.
