bridging the gap Kayume Baksh, 2019-07-02 This book provides a fascinating well researched and thorough discussion of the connections between science and spirituality including religion It is eye opening and allows readers to truly redefine how they look at these disciplines while providing at the same time a vibrant perspective for those embarking on such an exercise for the first time Science investigates the physical world where space time and matter comprise the main aspects of its empirical approach that is of physically proving all that there is around us Spirituality goes beyond the physical Here physical quantities become nonexistent and so our connections are perceived through seemingly nonrational but hardly irrational unscientific means Religion is rendered useless as a way of explaining how the universe works Quantum mechanics an integral part of modern physics is helping to bring about a closer convergence by showing remarkable similarities between advanced scientific observations and what has been taught for centuries in the wisdom traditions known as spirituality this insightful information continues to amaze us like none before We therefore now have the right combination and evidence to show why the gap between science and spirituality must be bridged so that we can finally embrace the answers to the mystery questions about the universe and life This thought provoking book provides the details you need We stand on the verge of heralding a new paradigm or rather a metaparadigm the mother of all paradigms one that unfolds a new vision of reality that includes consciousness for the first time not excludes it as science still does Whether you belong to a religion or not are a spiritualist an atheist an agnostic or just curious about the universe and life this book is for you *Spiritual Information* Charles L. Harper, 2005-06 *Spiritual Information* is a collection of one hundred essays that explore a portion of the vast interdisciplinary approaches to the study of science and religion Individually and together the essays show how the study of ourselves our planet and the universe helps us understand our place as spiritual beings within God's universe The book is a tribute to Sir John Templeton and his pioneering commitment toward new research that results in one hundredfold more spiritual information than humankind has ever possessed before It begins with essays that reflect on Sir John's principal domains of interest and expertise free enterprise based finance and accelerating spiritual progress Themes of the sections are Science Religion Dialogue Cosmology Physics and Astronomy Mathematics Musicology and Speculation Biological Evolution the Human Being Social Evolution the Human Mind and Heart Religion and Health The Nature of the Divine Theology and Philosophy Faith Traditions Sir John's leadership has enabled us to edge ever closer to the frontier where knowledge meets wisdom at the threshold of ultimate reality notes the editor in the preface to this volume As *Spiritual Information* presents an overview of how far we have come in the science and religion dialogue it also opens windows to the vast possibilities for additional research and further advances in spiritual information **Spirituality is a Science** Bahram Elahi, 1999 Faith and reason belief and experimentation spirituality and science in our modern era we have come to view these concepts as inherently dichotomous How can spirituality be considered a science when the very foundation of modern science was established in contrast or even in opposition to certain systems of thought inherited from religious traditions

Through a series of innovative and thought provoking studies Dr Bahram Elahi redefines spirituality as an experimental science rooted in concrete and empirically verifiable realities

The Ambient Christ Joseph Masterleo, 2020-12-01 There is a unified field in the cosmos that holds everything together and every discipline is a portal to it Science calls it a field of fundamental forces and elementary particles Religion calls it God and accepts it by faith as an impenetrable mystery How can their unbending perspectives be reconciled In *The Ambient Christ* the author proposes a novel paradigm that explains their complementarity as a seamless unity This innovative model provides a new story for an ailing and divided planet in the twenty first century and a viable solution to the holy grail quest There is something too narrow and missing in the gospel as it is presented to us In spite of appearances our age is more religious than ever it only needs stronger meat Pierre Teilhard de Chardin A religion old or new that stressed the magnificence of the universe as revealed by modern science might be able to draw forth reserves of reverence and awe hardly tapped by conventional faiths Sooner or later such a religion will emerge Carl Sagan

Spirituality Beyond Science and Religion Lillian Stover Wells, Jack McMahan, William Pillow, 2012-05-25 Spirituality means something different to everyone Some may believe it involves participating in organized religion Others may prefer it to be more personal like getting in touch with ones inner self through yoga meditation quiet reflection or even long walks A few may find that it lies in finding a new sense of purpose for their lives *Spirituality Beyond Science and Religion* addresses all of these and more through a new paradigm about life and death It lifts readers above their daily press for competitive survival and success by going to the heart of all spirituality The book disputes traditional sciences claim that physical matter is the only reality It also helps explain enigmas that have confronted orthodox religion for centuries To do so this book correlates published research from nearly one hundred and fifty authors and professionals in medicine neuroscience psychology theology history and metaphysics It explores new insights being revealed through thousands of subjective experiences around the world all of them beyond the ability of science or religion to explain The book therefore not only offers reassurance that death is not final but it also discloses profound implications for how we live our lives on earth

The US Review of Books *Spirituality Beyond Science and Religion* by William Pillow with Jack McMahan and Lillian Stover Wells iUniverse reviewed by Priscilla Estes but deep inside us is the recognition that life can and should have more meaning one that reaches far beyond traditional science and orthodox religion and one that involves all of us The mind body spirit MBS publishing industry has come a long way since the 1960s and 1970s when Aldous Huxley Hermann Hesse and Carlos Castaneda combined Eastern and Western thought in the best sellers *Doors of Perception* *Siddhartha* and *The Teachings of Don Juan* respectively In fact according to religion and publishing expert Elizabeth Puttick MBS publishing is the fastest growing non fiction genre which a quick examination of virtual and real bookstores supports More than ever before great minds race to close the gap between science and religion to answer the questions of where do we come from why are we

here and where do we go after death We search for answers inside the human brain the psyche the fetus gravity energy fields near death experiences NDEs universal consciousness time travel soul travel quantum medicine karma dharma and more it's hard for the average person to comprehend let alone keep up Finally here is a book that helps pull it all together for us written by William Pillow ex US Air Force and retired pharmacist with thirty four years at Eli Lilly Pillow began a quest to discover where we go after death and why when a long and lingering illness befell his wife and he confronted aging Initially a Southern Baptist and a skeptic about all things metaphysical he changed his mind while reading the incredible body of research on soul survival After prodigious investigation much of which concerns NDEs and studies on fetal awareness Pillow concluded there is a soul a God and a Heaven His conclusions may challenge your philosophy but parenthetical documentation and a fifteen page bibliography encourage independent verification The book starts slowly and carefully as Pillow builds his case by conscientiously stitching together scientific religious and metaphysical literature both ancient and modern on the nature of God the spark of life souls the human superconsciousness and Heaven the spirit world The brain begins to smoke while chugging through study after study on NDEs shared NDEs life between lives LBL out of body experiences OBE past life regression after death communications ADC pre birth visions neurological pathways the transcendent source of consciousness the ego and more We long for an index a glossary and less use of quotes around words that don't require them Halfway through our mental labors are rewarded with chapter 7 Our Incomparable Souls This is the heart of the book a behind the scenes look at the soul and a parting of the veil of forgetfulness produced by the ego Pillow discusses studies on fetal consciousness which provide the strongest circumstantial evidence for existence of the soul and gives a moving testament to the soul's purpose to instill compassion empathy and benevolence in its human host The second half of the book flies by as we greedily gobble mainstream studies on energy healing brain waves and the need for face to face friendships in an electronically connected world Tucked unobtrusively at the end of chapter 11 are three paragraphs titled For Me Personally in which the author shares his private definition of faith Such unheralded brevity from a man who once considered entering the Christian ministry shows great respect for the reader and for the role of science in decoding religion and spirituality The final chapter implores us to at least consider the possible importance of these concepts and commentaries for your loved ones and for you Pillow believes that by knowing there is a God a soul and a Heaven we can sustain our inner journey toward purpose and meaning in our lives and that by recognizing our shared humanity we can save civilization One hopes and prays this is true as murders by children mass killings by governments greed corruption materialism apathy mental illness addiction and more threaten to suffocate humanity's life force Pillow is an accomplished author having written or edited five educational textbooks several dozen articles one murder mystery involving reincarnation and the paranormal and five books about the search for self and the meaning of life through science self awareness and spirituality Spirituality Beyond Science and Religion is his first book written with theologian Jack McMahan and clinical

psychologist Lillian Stover Wells Pillow brilliantly connects his philosophy on the soul God and Heaven with salient literature in the field of science and religion The MBS genre has come a long way from the Indian fables and drug induced journeys of the sixties and seventies Pillow s overall message that the power of love is greater than the love of power points us in the right direction for the twenty first century *Science And Health* Mary Baker Eddy,2014-03-17 *Science And Health* is the foundational textbook on the system of physically emotionally or mentally healing your mind and body It is based on Mary Baker Eddys discoveries and what she afterwards named Christian Science The book offers new spiritual insights on the scriptures and briefs the reader with regard to his relationship with God
