according to Einstein's Equations God is energy and so is our Divine soul Each of us receives a tiny piece of God's virtually infinite energy and the difference between our energy and that of God is simply the enormous difference in order of magnitude when comparing God's energy to ours The behavior of this energy mirrors the equations brilliantly originated and described by Albert Einstein with two exceptions the mass m referenced in Einstein's famous equation $E = mc^2$ is a special Mass M originating in God's energy particles and God's and our soul energy travels at one million times the speed of light c or 186 billion miles per second In fact this Mass is the source of the independent intelligence and sensory properties found in the soul of all human brains Putting God Into Einstein's Equations Energy of the Soul is a provocative and compelling book that weaves together empirical scientific observation academic research and theoretical and theological considerations bolstered by revelatory first hand testimony bearing witness to the existence of the Divine soul in both the physical and spirit worlds Contained in the pages of Putting God Into Einstein's Equations are moving personal reflections on the author's life experiences from the thrill of discovering one's true soul mate to both traumatic and joyous events like a descent into bipolar depression Divine miracles and the pain and loss associated with the death of a loved one Equally explored and discussed are practical first hand experiential techniques for hypnotic spiritual world regression and directing spiritual energy and using light to alleviate negative forces Above all else Putting God Into Einstein's Equations seeks to advance an awareness and comprehension of God drawing upon points of reference as diverse as Qigong and yoga to the word of rabbinical scholars

Ryan, 2017-03-02 During the thirteenth and fourteenth centuries religious zeal nourished by the mendicants sense of purpose motivated Dominican and Franciscan friars to venture far beyond Europe s cultural frontiers to spread their Christian faith into the farthest reaches of Asia Their incredible journeys were reminiscent of heroic missionary ventures in earlier eras and far more exotic than evangelization during the tenth through twelfth centuries when the western church Christianized Eastern Europe and Scandinavia This new mission effort was stimulated by a variety of factors and facilitated by the establishment of the Mongol Empire and as the fourteenth century dawned missionaries entertained fervent but vain hopes of success within khanates in China Central Asia Persia and Kipchak The reports these missionaries sent back to Europe have fascinated successive generations of historians who analyzed their travels and struggled to understand their motives and aspirations The essays selected for this volume drawn from a range of twentieth century historians and contextualized in the introduction provide a comprehensive overview of missionary efforts in Asia and of the developments in the secular world that both made them possible and encouraged the missionaries hopes for success Three of the studies have been translated from French specially for publication in this volume
