thousands of descriptions of epidemics reaching back before the fifth century BCE Plague of Athens to the distrust and  
violence that erupted with Ebola in 2014 Epidemics challenges a dominant hypothesis in the study of epidemics that  
invariably across time and space epidemics provoked hatred blaming of the other and victimizing bearers of epidemic  
diseases particularly when diseases were mysterious without known cures or preventive measures as with AIDS during the  
last two decades of the twentieth century However scholars and public intellectuals especially post AIDS have missed a  
fundamental aspect of the history of epidemics Instead of sparking hatred and blame this study traces epidemics socio  
psychological consequences across time and discovers a radically different picture that epidemic diseases have more often  
unified societies across class race ethnicity and religion spurring self sacrifice and compassion    California Cultivator
