**The Law and Governance of Mining and Minerals** Ana Elizabeth Bastida, 2020-12-10 This book explores a disciplinary matrix for the study of the law and governance concerning mining and minerals from a global perspective The book considers the key challenges of achieving the goals of Agenda 2030 and the transition to low carbon circular economies The perspective encompasses the multi faceted and highly complex interaction of multiple fields of international law and policy soft law and standards domestic laws and regulations as well as local levels of ordering of social relations What

emerges is a largely neglected unsystematised and under theorised field of study which lies at the intersection of the global economy environmental sustainability human rights and social equity But it also underlies the many loopholes to address at all levels most notably at the local level land and land holders artisanal miners ecosystems local economies local linkages and development The book calls for a truly cosmopolitan academic discipline to be built and identifies challenges to do so It also sets a research agenda for further studies in this fast changing field

*International Governance of the Arctic Marine Environment* Lilly Weidemann, 2014-04-09 The Arctic is particularly affected by climate change over the past few decades temperatures in this area have risen twice as fast as the mean global rate The most prominent effect of global climate change in the region is the melting sea ice in the Arctic Ocean which enables a multitude of ocean uses to be initiated and extended such as shipping fishing and oil and gas extraction Unlike in the Antarctic there is currently no single comprehensive legal regime for governance of the Arctic Instead the region is regulated by a patchwork of international treaties above all the United Nations Convention on the Law of the Sea UNCLOS various regional and sub regional agreements national laws and soft law agreements This treatise provides an evaluation of the governance regime that regulates the use of the Arctic marine environment and its readiness to protect these fragile ecosystems in light of the consequences of climate change

*The IMLI Treatise On Global Ocean Governance* David Joseph Attard, David M Ong, Dino Kritsiotis, 2018-07-11 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically With seemingly no opportunity for revision due to the Conventions burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations This approach is inherently fragmented and unable to achieve sustainable global ocean governance In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans This volume focuses on the role of UN as the central intergovernmental organization responsible for global ocean governance It examines the ocean governance challenges and how the present legal policy and institutional frameworks of the UN have addressed these challenges It identifies the strengths and weaknesses of UN legal structures and offers tangible proposals to realize the ambition of a global ocean governance system

**The Multi-level Governance of Space Mining** Antonino Salmeri, 2023-02-07 Aerospace Law and Policy Series Volume 24 Space mining holds the potential to revolutionize the space sector but whether this revolution will be for good or for worse depends on how it will be governed Under the right framework space resource activities can enable a new era of prosperous and sustainable space exploration But with the wrong rules or lack thereof they have the potential to destabilize the peaceful and

cooperative uses of space This book provides an in depth analysis of how the systemic nature of international law existing provisions of international space law and a growing number of national legislations are shaping the multi level governance of space mining including an unprecedented assessment of possible adjudication and enforcement options The author investigates the multi level framework of space law provision by provision foregrounding relevant implications for the governance of space mining Questions addressed include the following Which national and international provisions govern the conduct of space resource activities Are these provisions sufficient and can they be enforced How can we evolve the existing framework to govern large scale long term space resource activities What practical lessons can be learnt from comparable regulatory regimes governing the sea telecommunications and Antarctica The author moves from general to particular beginning with the status of international law as a legal order and ending with the specific options available for enforcing norms applicable to space mining The book concludes by evaluating the tenure of the current governance system and proposing three pragmatic correctives to stabilize it in the short medium and long term Professionals and academics involved or interested in space mining will find this book indispensable It will provide them with a full and clear picture of the regulatory status quo as well as with expert advice on how to navigate the complex dynamics of contemporary policymaking efforts in this area Space mining operators can further use this book to understand the implications of domestic and international provisions applicable to their activities Finally regulators and policymakers can leverage the analysis conducted in this book to identify the key aspects to be addressed for the safe sustainable rational and peaceful conduct of space resource activities in accordance with international law and as the province of all humankind
