The ongoing vibrant expansion and strong growth of the field during the last decade has fueled this second edition of the Springer Handbook of Robotics. The first edition of the handbook soon became a landmark in robotics publishing and won the American Association of Publishers PROSE Award for Excellence in Physical Sciences/Mathematics as well as the organization's Award for Engineering Technology. The second edition of the handbook, edited by two internationally renowned scientists with the support of an outstanding team of seven part editors and more than 200 authors, continues to be an authoritative reference for robotics researchers, newcomers to the field, and scholars from related disciplines. The contents have been restructured to achieve four main objectives: the enlargement of foundational topics for robotics; the enlightenment of design of various types of robotic systems; the extension of the treatment on robots moving in the environment; and the enrichment of advanced robotics applications. Further to an extensive update, fifteen new chapters have been introduced on emerging topics, and a new generation of authors have joined the handbook's team. A novel addition to the second edition is a comprehensive collection of multimedia references to more than 700 videos which bring valuable insight into the contents. The videos can be viewed directly, augmented into the text with a smartphone or tablet using a unique and specially designed app. Springer Handbook of Robotics Multimedia Extension Portal: <http://handbookofrobotics.org>

Social Media Archeology and Poetics Judy Malloy, 2025-05-27

First person accounts by pioneers in the field, classic essays, and new scholarship document the collaborative and creative practices of early social media. Focusing on early social media in the arts and humanities and on the core role of creative computer scientists, artists, and scholars in shaping the pre-Web social media landscape, *Social Media Archeology and Poetics* documents social media lineage beginning in the 1970s with collaborative ARPANET research, Community Memory, PLATO, Minitel, and ARTEX, and continuing into the 1980s and beyond with the Electronic Caf, Art Com, Electronic Network Arts, Wire, The THING, and many more. With first person accounts from pioneers in the field as well as papers by artists, scholars, and curators, *Social Media Archeology and Poetics* documents how these platforms were vital components of early social networking and important in the development of new media and electronic literature. It describes platforms that allowed artists and musicians to share and publish their work, community networking, diversity, and the creation of footholds for the arts and humanities online. And it invites comparisons of social media in the past and present, asking: What can we learn from early social media that will inspire us to envision a greater cultural presence on contemporary social media?
