

## Limiting Reactant Guided Inquiry

### Why?

If a factory runs out of tires while manufacturing cars, production stops. No more cars can be fully built without ordering more tires. A similar thing happens in a chemical reaction. If there are fixed amounts of reactants to work with in a chemical reaction, one of the reactants may be used up first. This prevents the production of more products. In this activity, you will look at several situations where the process or reaction is stopped because one of the required components has been used up.

**The Medical Evaluation of Psychiatric Patients** R.F. Klein,R.B. Schiffer,R.C. Sider,2013-06-29 One of the fascinations of psychiatry is that it is amenable to many different approaches In seeking to account for mental disorder for example it is possible to explore the meaning and significance of symptoms in the psychodynamic sense to examine the social determinants of illness or to adopt an essentially biological viewpoint in investigating links between physiological and psychological dysfunction As a clinical discipline it may be practiced in the community in the specialized clinic or hospital or shoulder to shoulder with other medical practitioners in the general hospital This richness and diversity are at once a strength and a weakness attracting practitioners with a wide range of talents and interests yet sometimes leading to polarizations and false antitheses The so called medical model of psychiatry has come under a good deal of attack and deservedly so when claiming an exclusive provenance over all types and aspects of mental disorder What cannot be gainsaid however is the central role of medicine in relation to many parts of the field and the success in terms of understanding and therapy that has resulted from medicine's involvement Nor can it be doubted after the most cursory acquaintance with the physically or mentally ill that the relationship between these two forms of suffering is often so close and so mutually reinforcing that distinctions are drawn somewhat arbitrarily This last is perhaps the cardinal reason for the alliance between medicine and psychiatry
