our affluent western lifestyle will soon exceed the limits of the earth's sustainable capacity and must soon change drastically to ward off a worldwide environmental collapse. Knowing this, we should all reevaluate the daily routines we take for granted: taking the car to work, boarding a plane to a business or vacation destination, eating meat, or using plastic bags in stores. There are ethical and ecological objections to each of these examples. In fact, if we applied a strict ethical analysis to our lifestyle, almost nothing we do would pass muster. A lot of avoidable suffering attaches to our way of life. After reading this book, the world won't look the same. Concluding with an eco-humanist manifesto, this book not only offers much food for thought but more importantly, an urgent and inspiring call to action.

Fixing the world requires a vibrant and successful profit-yielding, tax-delivering, job-creating business sector. This book describes how that sector is built and how the good of business means the good of all. Learn why business must invest more and better in physical and human infrastructure. Discover the critical importance of social inclusion in the future of business. Understand why fixing education and the environment are at the top of the priority list. Engage with every aspect of society to create the wealth that holds the social fabric together. From the smallest shop around the corner to the largest multinational corporation, the variable upon which every facet of business success rests is people. Workers, investors, customers, creditors all ensure that wealth is created, and at the end of the day, they are what business is about. *Fixing Business* shows us how to harness their power to change the world.
