Commission of Fine Arts, 1978 Source Book of American Architecture George Everard Kidder Smith, 1996 Scorched Earth is the first book to chronicle the effects of chemical warfare on the Vietnamese people and their environment where even today more than 3 million people including 500 000 children are sick and dying from birth defects cancer and other illnesses that can be directly traced to Agent Orange dioxin exposure Weaving first person accounts with original research Vietnam War scholar Fred A Wilcox examines long term consequences for future generations laying bare the ongoing monumental tragedy in Vietnam and calls for the United States government to finally admit its role in chemical warfare in Vietnam Wilcox also warns readers that unless we stop poisoning our air food and water

Vietnam has chosen August 10 the day that the US began spraying Agent Orange on Vietnam as Agent Orange Day to commemorate all its citizens who were affected by the deadly chemical. The Arthurian Architecture of H. H. Richardson Brian Peter Bubenzer, 2002 **Architecture**

After Richardson Margaret Henderson Floyd, 1994-09 Over the years their commissions included scores of city and country residences for the elite of both regions as well as major institutional and business buildings such as those at Harvard and Radcliffe, the Cambridge City Hall and Pittsburgh's Duquesne Club and Carnegie Institute. *American Architects and the Mechanics of Fame* Roxanne Kuter Williamson, 2014-03-07 Why does one talented individual win lasting recognition in a particular field while another equally talented person does not? While there are many possible reasons, one obvious answer is that something more than talent is requisite to produce fame. The something more in the field of architecture asserts Roxanne Williamson is the association with a famous architect at the moment he or she first receives major publicity or designs the building for which he or she will eventually be celebrated. In this study of more than six hundred American architects who have achieved a place in architectural histories, Williamson finds that only a small minority do not fit the right person, right time pattern. She traces the apprenticeship connection in case studies of Louis Sullivan, Frank Lloyd Wright, Henry Hobson Richardson, the firm of McKim, Mead & White, Latrobe and his descendants, the Bulfinch and Renwick Lines, the European immigrant masters and Louis Kahn. Although she acknowledges and discusses the importance of family connections, the right schools, self-promotion, scholarships, design competition awards and promotion by important journals, Williamson maintains that the apprenticeship connection is the single most important predictor of architectural fame. She offers the intriguing hypothesis that what is transferred in the relationship is not a particular style or approach but rather the courage and self-confidence to be true to one's own vision. Perhaps she says this is the case in all the arts. *American Architects and the Mechanics of Fame* is sure to provoke thought and comment in architecture and other creative fields. *A History of American Architecture* Mark Gelernter, 2001 Why did the colonial Americans give over a significant part of their homes to a grand staircase? Why did the Victorians drape their buildings in ornate decoration? And why did American buildings grow so tall in the last decades of the 19th century? This book explores the history of American architecture from prehistoric times to the present, explaining why characteristic architectural forms arose at particular times and in particular places.

Louis H. Sullivan and a 19th-Century Poetics of Naturalized Architecture Lauren S. Weingarten, 2017-07-05 For most of the twentieth century, modernist viewers dismissed the architectural ornament of Louis H. Sullivan (1856-1924) and the majority of his theoretical writings as emotional outbursts of an outmoded romanticism. In this study, Lauren Weingarten reveals Sullivan

s eloquent articulation of nineteenth century romantic practices literary linguistic aesthetic spiritual and nationalistic and thus rescues Sullivan and his legacy from the narrow role imposed on him as a pioneer of twentieth century modernism Using three interpretive models discourse theory poststructural semiotic analysis and a pragmatic concept of sign functions she restores the integrity of Sullivan s artistic choices and his historical position as a culminating figure within nineteenth century romanticism By giving equal weight to Louis Sullivan s writings and designs Weingarden shows how he translated both Ruskin s tenets of Gothic naturalism and Whitman s poetry of the American landscape into elemental structural forms and organic ornamentation Viewed as a site where various romantic discourses converged Sullivan s oeuvre demands a cross disciplinary exploration of each discursive practice and its rules of accumulation exclusion reactivation The overarching theme of this study is the interrogation and restitution of those Foucauldian rules that enabled Sullivan to articulate architecture as a pictorial mode of landscape art which he considered co equal with the spiritual and didactic functions of landscape poetry
