*A National Strategy for the Elimination of Hepatitis B and C* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on a National Strategy for the Elimination of Hepatitis B and C, 2017-07-30 Hepatitis B and C cause most cases of hepatitis in the United States and the world. The two diseases account for about a million deaths a year and 78 percent of world's hepatocellular carcinoma and more than half of all fatal cirrhosis. In 2013, viral hepatitis of which hepatitis B virus (HBV) and hepatitis C virus (HCV) are the most common types surpassed HIV and AIDS to become the seventh leading cause of death worldwide. The world now has the tools to prevent hepatitis B and cure hepatitis C. Perfect vaccination could eradicate HBV but it would take two generations at least. In the meantime, there is no cure for the millions of people already infected. Conversely, there is no vaccine for HCV but new direct acting antivirals can cure 95 percent of chronic infections though these drugs are unlikely to reach all chronically infected people anytime soon. This report is the second of two builds off the conclusions of the first report and outlines a strategy for hepatitis reduction over time and specific actions to achieve them. **Eliminating the Public**

The phase two report will outline a strategy for meeting the elimination goals discussed in this report. *Viral Hepatitis* Howard C. Thomas, Anna S. Lok, Stephen A.

Locarnini, Arie J. Zuckerman, 2013-10-14 The 4th edition of *Viral Hepatitis* covers comprehensively the entire complex field of infections caused by all of the different hepatitis viruses which affect many millions of people throughout the world with considerable morbidity and mortality. Howard Thomas and Arie Zuckerman are joined by Anna Lok from the USA and Stephen Locarnini from Australia as Editors. They have recruited leading researchers and physicians from many countries who have produced an authoritative account of current knowledge and research on this important infection including new insights into immune response to HBV and HCV. The result is a comprehensive account on all aspects of viral hepatitis.
