example of a more complex combo is the UKC Ultimate Kettlebell Combo which consists out of a deadlift hang clean swing clean swing half snatch and strict press A really simple but powerful combo is the double kettlebell half snatch and squat thruster also known as WBKC World's Best Kettlebell Combo Isolation Exercises This book wouldn't be complete without some isolation exercises Isolation exercises are those that involve only one joint and a limited number of muscle groups Isolation allows you to focus more and go heavier A good example is an exercise that is performed standing up standing up will require more muscle recruitment whereas a laying down exercise will take out all those muscles that were required to stand up i.e. calves quadriceps gluteals erector spinae and many more Multi planar Exercises The exercises listed in this category are not the only multi planar exercises there are many more a good example of a popular multi planar exercise not listed here is the kettlebell snatch The reason the exercises are listed under this category is that there was not one parent exercise category under which they fall In basic terms multi planar exercises are those that go up down back to the side etc they move through multiple planes of movement in one rep A good example of a non multi planar exercise is the shoulder press Note whether an exercise is or isn't multi planar doesn't make it a bad or good exercise it just describes that it goes through multiple planes of movement

other exercises such as the clean and snatch The swing can be actioned as a pull or pendulum The most common variation outside of the sport world is the pulling version whereas in the sport world it s the opposite and the pendulum is common Kettlebell Snatch A snatch is a movement in which the kettlebell rapidly raised from a lower position always below the hips to above the head in one continuous smooth explosive movement An example of a few common start positions are dead hanging and swinging
