3. Describe the process that she used to determine the percentage of cats that weighed between 5 and 9 pounds.

She pulled on one of the icons to separate them in to groups, than she pulled it again, and got 3 groupings. Than, she stacked them up with the stack buttons. Than she used count to see the count of the cats pounds, than she eventually used the percentage icon to see the percentage of cats that weighted between 5 to 9 pounds.

4. Which way do you drag dots to organize the data into more and more groups, eventually placing all of the data along the x-axis?
She pulled the case all the way to right. Than she dragged a colour to the graph.
5. What "interesting" feature did she identify about the distribution of cat lengths?
