Proceedings of the 15th International Conference on Ubiquitous Computing & Ambient Intelligence (UCAmI 2023) José Bravo, Gabriel Urzáiz, 2023-11-25 This book serves as a comprehensive compilation of groundbreaking research endeavors within the realms of ambient intelligence and ubiquitous computing These initiatives are pivotal in enabling both researchers and practitioners to discern recent breakthroughs and emerging frontiers in these fields Encompassing a wide array of domains including Ambient Active and Assisted Living A3L the Internet of Things IoT Smart Environments Data Science and Human Ambient Interaction acts as a valuable resource for scholars professionals and graduate students alike The primary aim of this book is to empower individuals within the academic and professional community to harness this wealth of knowledge It equips them to tackle innovative challenges and engineer smart and ubiquitous solutions that will shape the landscape of the next decade By amalgamating insights from various facets of ambient intelligence and ubiquitous computing this book encourages cross disciplinary collaboration and fosters a holistic understanding of the field Thus it not only highlights the recent strides in these areas but also serves as a roadmap for future exploration and innovation paving the way for a smarter and more interconnected world

Third-Generation Neuroimaging: Translating Research into Clinical Utility André Schmidt, Stefan Borgwardt, 2016-11-02 Psychiatric imaging needs to move away from simple investigations of the neurobiology underling the early phases of psychiatric diseases to translate imaging findings in the clinical field targeting clinical outcomes including transition remission and response to preventative interventions This research topic aims to bring psychiatric neuroimaging studies towards translational impacts in clinical practice suggesting that brain abnormalities may

be of potential use for detecting clinical outcomes as treatment response First generation psychiatric neuroimaging focused on simple structural brain alterations associated with the neurobiology of the illness These early studies adopted imaging methods mainly including computerized tomography CT to investigate brain size Second generation psychiatric neuroimaging studies benefited from more sophisticated techniques which included structural methods sMRI coupled with whole brain automated methods voxel based morphometry VBM white matter methods diffusion tensor imaging DTI and tractography functional methods functional magnetic resonance imaging fMRI and advanced neurochemical imaging PET techniques addressing receptor bindings and pre post synaptic functions magnetic resonance spectroscopy MRS and sophisticated meta analytical imaging methods However no consistent or reliable anatomical or functional brain alterations have been univocally associated with any psychiatric disorder and no clinical applications have been developed in psychiatric neuroimaging There is thus urgent need of psychiatric imaging to move towards third generation paradigms In this research topic these novel neuroimaging studies here requested to move away from simple investigations of the neurobiology to translate imaging findings in the clinical field targeting longitudinal outcomes including transition remission and response to preventative interventions With respect to methods the most recent neuroimaging approaches e g structural and functional MRI EEG DTI spectroscopy PET are welcome Third generation psychiatric imaging studies including multimodal approaches multi center analyses mega analyses effective connectivity dynamic causal modelling support vector machines structural equation modelling or graph theory analysis are highly appreciated Furthermore these third generation imaging studies may benefit from the incorporation of new sources of neurobiological information such as whole genome sequencing proteomic lipidomic and expression profiles and cellular models derived from recent induced pluripotent stem cells research We collect Original Research Reviews Mini Reviews Book Review Clinical Case Study Clinical Trial Editorial General Commentary Hypothesis Theory Methods Mini Opinion Perspective and Technology Report from international researcher and clinicians in this field The purpose of this research topic is intended to provide the field with current third generation neuroimaging approaches in translational psychiatry that is hoped to improve and create therapeutic options for psychiatric diseases
