*New Journalism Ecologies in East and Southern Africa* Trust Matsilele, Shepherd Mpofu, Dumisani Moyo, 2023-03-24 This volume presents case studies of news media employing and integrating social media into their news production practices It links social media use to journalistic practices and news production processes in the digital age of the Global South Critically the chapters look at seminal cases of start up news media whose content is informed by trends in social media ethical considerations and participatory cultures spurred by the wide use of social media There has been considerable research looking at the potential of new media technologies traditional journalism and citizen reporting The extent to which these new media technologies and citizen journalism have morphed or reconfigured traditional journalism practice remains debatable Currently there are questions around the limits of social media in journalism practice as the ethical lines continue to become blurred It is this conundrum of the role of social media in the reconfiguration of the media news making production and participatory cultures that requires more investigation Social media has also turned the logic of the political economy of media production on its head as citizens can now produce package and distribute news and information with shoestring budgets and in authoritarian regimes with no license of practice This new political economy means the power that special interest groups used to enjoy is increasingly slipping from their hands as citizens take back the power to appropriate social media journalism to counter hegemonic narratives Citizens can also perform journalistic roles of investigating and whistleblowing but with a lack off or limited regulation This volume seeks to explore and untangle these issues and provides an invaluable resource for researchers across the field of journalism mass media and communication studies **Online**
