Livestock Production And Climate Change Cabi Climate Change Series:

Livestock Production and Climate Change Pradeep K Malik, Raghavendra Bhatta, Junichi Takahashi, Richard Kohn, Cadaba S Prasad, 2015-04-22 In a changing climate livestock production is expected to exhibit dual roles of mitigation and adaptation in order to meet the challenge of food security This book approaches the issues of livestock production and climate change through three sections I Livestock production II Climate change and III Enteric methane amelioration Section I addresses issues of feed quality and availability abiotic stress heat and nutritional and strategies for alleviation livestock generated nitrogen and phosphorus pollution and approaches for harnessing the complex gut microbial diversity Section II discusses the effects of climate change on livestock diversity farm animal reproduction impact of meat production on climate change and emphasising the role of indigenous livestock in climatic change to sustain production Section III deals with the most recent approaches to amelioration of livestock methane such as breeding for low methane emissions reductive acetogenesis immunization vaccine based concepts and archaea phage therapy [Climate Change and Livestock Production: Recent Advances and Future Perspectives](#) Veerasamy Sejian, Surinder Singh Chauhan, Chinnasamy Devaraj, Pradeep Kumar Malik, Raghavendra Bhatta, 2022-02-06 This book describes the importance of sustainable livestock production from a food security perspective in the changing climate scenario It covers the amelioration of climate change impacts and describes the various mitigation strategies to reduce enteric methane emissions The book targets sustainable livestock production by covering diverse concepts of amelioration mitigation and policy up gradation Further it examines various adverse impacts of climate change on growth meat milk and reproduction in livestock Most importantly the book covers novel aspects of quantifying heat stress response of livestock based on non invasive methodologies including infrared thermal imaging sensor based applications hair urine and fecal cortisol estimation Particular emphasis was given to describing the skin based novel approaches to establish climate resilience in indigenous breeds The book provides detailed descriptions of alleviating climate change impacts on shelter management nutritional interventions and genetics based strategies involving advanced genomic tools Lastly it highlights the livestock species which could be considered ideal climate resilient animal models to withstand the adversities associated with climate change **Climate Change Impact and Adaptation in Agricultural Systems** Jurg Fuhrer, Peter J Gregory, 2014-06-18 The focus of this book is future global climate change and its implications for agricultural systems which are the main sources of agricultural goods and services provided to society These systems are either based on crop or livestock production or on combinations of the two with characteristics that differ between regions and between levels of management intensity In turn they also differ in their sensitivity to projected future changes in climate and improvements to increase climate resilience need to be tailored to the specific needs of each system The book will bring together a series of chapters that provide scientific insights to possible implications of projected climate changes for different important types of crop and livestock systems and a discussion of options for adaptive

and mitigative management **International Yearbook of Soil Law and Policy 2022** Harald Ginzky, Fabiano De Andrade Corrêa, Elizabeth Dooley, Irene L. Heuser, Patricia Kameri-Mbote, Robert Kibugi, Oliver C. Ruppel, 2024-03-01 This open access book presents an important discussion on the interface between sustainable soil management and climate mitigation and adaptation. It investigates a variety of aspects in this context such as the political and societal consequences for countries in the Global South, an assessment of the outcomes of the UNFCCC Conference of Parties held in Glasgow, appropriate legal instruments to promote desertification regulatory concepts for negative emissions in soil and land use, the debate in Europe on carbon uptake in soils and the climate related policy of the Convention on Biological Diversity. Lastly, it provides information on recent court rulings on climate mitigation in Germany and Australia and their relevance for sustainable soil management. This sixth volume of the International Yearbook of Soil Law and Policy is divided into four parts, the first of which deals with various aspects of the theme Climate Mitigation and Adaptation and Sustainable Soil Management. The second part covers recent international developments, the third presents regional and national reports, and the fourth discusses overarching issues. Given the range of key topics covered, the book offers an indispensable tool for all academics, legislators, and policymakers working in this field. The International Yearbook of Soil Law and Policy series discusses central questions in law and politics with regard to the protection and sustainable management of soil and land at the international, national, and regional level.

Climate Change Impact on Livestock: Adaptation and Mitigation Veerasamy Sejian, John Gaughan, Lance Baumgard, Cadaba Prasad, 2015-03-31 This volume addresses in detail both livestock's role in climate change and the impacts of climate change on livestock production and reproduction. Apart from these cardinal principles of climate change and livestock production, this volume also examines the various strategies used to mitigate livestock-related GHG emissions and those which can reduce the impacts of climate change on livestock production and reproduction. Presenting information and case studies collected and analyzed by professionals working in diversified ecological zones, the book explores the influence of climate change on livestock production across the globe. The most significant feature of this book is that it addresses in detail the different adaptation strategies and identifies targets for different stakeholders in connection with climate change and livestock production. Further, it puts forward development plans that will allow the livestock industries to cope with current climate changes and strategies that will mitigate the effects by 2025. Lastly, it provides researchers and policymakers several researchable priorities to help develop economically viable solutions for livestock production with less GHG emissions, promoting a cleaner environment in which human beings and livestock can live in harmony without adverse effects on productivity. Given that livestock production systems are sensitive to climate change and at the same time are themselves a contributor to the phenomenon, climate change has the potential to pose an increasingly formidable challenge to the development of the livestock sector. However, there is a dearth of scientific information on adapting livestock production to the changing climate, as such well-founded reference material on sustaining livestock production systems under the changing

climate scenarios in different agro ecological zones of the world is essential By methodically and extensively addressing all aspects of climate change and livestock production this volume offers a valuable tool for understanding the hidden intricacies of climatic stress and its influence on livestock production **CLIMATE CHANGES AND NATURAL RESOURCES** Mine ÇARDAK - Pınar YILDIRIM,2021-12-17 This book analyzes how the management of natural resources can affect climate change and how climate change affects energy food fisheries producing industries and national adaptation strategies in Turkey s perspective The schematic diagrams tables and graphs have been included to make the book more illustrative Resource management is analysed from the perspective of a capital conversion based model of development One important conclusion of the book is that integrating climate change concerns into resource management implies that some natural resources will need to be stranded in order to meet mitigation commitments compatible with the goal of limiting global warming to well below 2 degrees Celsius and pursuing efforts to limit the increase in the average value of global temperature to 1.5 degrees Celsius above pre industrial levels Epigenetics for Climate-Smart and Sustainable Agriculture Jen-Tsung Chen,2025-07-29 This book provides a state of the art overview of current achievements and future possibilities for the application of epigenetic and epigenomic techniques to the improvement of crops Creating crops more resilient to the stresses caused by climate change will be an important part of a climate smart and sustainable agriculture strategy for the future All critical environmental stressors are explored temperature salt drought pollutants pests fungi bacteria and viruses The exciting possibilities for the integration of epigenetic resources and technologies with plant functional genomics and the new field of precision molecular breeding in crops are discussed Examples are shown of crops showing better growth performance enhanced yields more efficient nutrient utilization and higher quality food production This book is an ideal complete guide for students researchers experts and professionals to overview this critical topic *Climate Change, Ecological Catastrophe, and the Contemporary Postcolonial Novel* Justyna Poray-Wybranowska,2020-12-21 *Climate Change Ecological Catastrophe and the Contemporary Novel* responds to the critical need for transdisciplinary research on the relationship between colonialism and catastrophe It represents the first sustained analysis of the connection between colonial legacy and present day ecological catastrophe in postcolonial fiction Analyzing contemporary South Asian and South Pacific novels that grapple with climate change and catastrophe environmental exploitation and instability and human nonhuman relationships in degraded environments it offers a much needed corrective to dominant narratives about climate crisis and the everyday Highlighting the contributions of literary fiction from the postcolonial South to the growing field of the environmental humanities this book reconsiders the novel s relationship with climate change and the contemporary environmental imaginary Counter to dominant current theoretical discourses it demonstrates that the novel form is ideally suited to literary and imaginative engagements with climate change and ecological catastrophe The six case studies it examines connect contemporary ecological vulnerability to colonial legacies reveal the critical role animals and the

environment play in literary imaginations of post catastrophe recovery and together constellate a decolonial perspective on ecological catastrophe in the era of climate change Drawing on the work of Indigenous authors and scholars who write about and against the Anthropocene this book displaces conventional ways of thinking about the relationship between the mundane and the catastrophic and promotes greater dialogue between the largely siloed fields of postcolonial Indigenous and disaster studies

Climate, Ticks and Disease Pat Nuttall, 2021-11-26 This book brings together expert opinions from scientists to consider the evidence for climate change and its impacts on ticks and tick borne infections It considers what is meant by climate change how effective climate models are in relation to ecosystems and provides predictions for changes in climate at global regional and local scales relevant for ticks and tick borne infections It examines changes to tick distribution and the evidence that climate change is responsible The effect of climate on the physiology and behaviour of ticks is stressed including potentially critical impacts on the tick microbiome Given that the notoriety of ticks derives from pathogens they transmit the book considers whether changes in climate affect vector capacity Ticks transmit a remarkable range of micro and macro parasites many of which are pathogens of humans and domesticated animals The intimacy between a tick borne agent and a tick vector means that any impacts of climate on a tick vector will impact tick borne pathogens Most obviously such impacts will be apparent as changes in disease incidence and prevalence The evidence that climate change is affecting diseases caused by tick borne pathogens is considered along with the potential to make robust predictions of future events

Handbook Of Climate Change And Agroecosystems - Climate Change And Farming System Planning In Africa And South Asia: Agmip Stakeholder-driven Research (In 2 Parts) Cynthia Rosenzweig, Carolyn Z Mutter, Erik Mencos Contreras, 2021-04-13 This two part handbook focuses on the work that the Agricultural Model Intercomparison and Improvement Project AgMIP accomplished using a new method the AgMIP Regional Integrated Assessment Protocol in Sub Saharan Africa SSA and South Asia SA with funding from the UK Department for International Development Through this research AgMIP substantially improves the characterization and understanding of food security in SSA and SA and how its affected by climate variability and change The chapters in this handbook demonstrate how AgMIP has enhanced the capacity of developing country researchers and stakeholders to work together exploring and prioritizing adaptation to current and future climate stresses Part 1 describes regional integrated assessment methods and analyses while Part 2 presents the outcomes of farming system studies The entire volume shows how AgMIP has established as a public good protocols for Regional Integrated Assessments that improve the capability of developing countries to address climate change challenges Related Link s [Climate change and agriculture](#) Dr Delphine Deryng, 2020-04-28 Provides a more holistic approach by combining research both on the impacts of climate change on agriculture and the contribution of agriculture to climate change Highlights advances in ways of predicting the effects of agriculture and climate change on one another Builds on this foundation to outline key mitigation strategies to achieve a more climate smart agriculture [Climate Change Impacts on](#)

Nigeria Johnbosco C. Egbueri, Joshua O. Ighalo, Chaitanya B. Pande, 2023-04-19 This book explores the impacts of climate change on Nigeria. How climate change impacts the productivity and future development of different sectors in Nigeria was covered in this book. Various themes of the Nigerian economy, environment and climate change were considered. Worthy of note are the impacts of climate change on the Nigerian air quality, surface and groundwater resources, watershed and natural resources development and planning, soil quality, fertility, salinization, nutrients and cropping patterns. Also, the impact of climate change on land use, land cover, urbanization and strategic planning, crops and sustainable crop yield, land degradation, soil erosion, landslides and landscapes, rainfall trend patterns, drought vulnerability, ecology, vegetation, forest carbon and biomass management of Nigeria were investigated. Finally, the problems of climate change in semi arid and arid regions with special emphasis on Nigeria and possible solutions for sustainable development under the changing climate were discussed in this book. Advanced technologies such as remote sensing, GIS, multivariate analytical tools and machine learning techniques were utilized in the exploration and analysis of the themes of this book. Thus, this book is a very important product for point of view researchers, scientists, NGOs and university communities on the Nigerian climate change. This book is a useful interdisciplinary tool cutting across various disciplines such as earth sciences, hydrology, environmental sciences, soil science, engineering, remote sensing, natural resources management and public health management etc.

The contribution of biodiversity for food and agriculture to the resilience of production systems Food and Agriculture Organization of the United Nations, 2019-06-24 This study reviews the available information on the contribution of biodiversity for food and agriculture to the resilience of crop, livestock, forest, fishery and aquaculture production systems to environmental change and uncertainty.

The Interaction of Food Industry and Environment Charis M. Galanakis, 2020-01-22 The Interaction of Food Industry and Environment addresses all levels of interaction, paying particular attention to avenues for responsible operational excellence in food production and processing. Written at a scientific level, this book explores many topics relating to the food industry and environment, including environmental management systems, environmental performance evaluation, the correlation between food industry, sustainable diets and environment, environmental regulation on the profitability of sustainable water use in the food industry, lifecycle assessment, green supply chain network design and sustainability, the valorization of food processing waste via biorefineries, food energy environment trilemma, wastewater treatment and much more. Readers will also find valuable information on energy production from food processing waste, packaging and food sustainability, the concept of virtual water in the food industry, water reconditioning and reuse in the food industry and control of odors in the food industry. This book is a welcomed resource for food scientists and technologists, environmentalists, food and environmental engineers and academics. Addresses the interaction between the food industry and environment at all levels. Focuses on the past decade's advances in the field. Provides a guide to optimize the current food industry's performance. Serves as a resource for anyone dealing with food and environmental science and technology. Includes coverage

of a variety of topics including performance indicators the correlation between the food industry sustainable diets and the environment environmental regulations lifecycle assessments green supply chain networks and more **Animal Science Reviews 2011** David Hemming,2012 Animal Science Reviews 2011 provides scientists and students in animal science with timely analysis on key topics in current research Originally published online in CAB Reviews this volume makes available in printed form the reviews in animal science published during 2011 Soil and Climate Rattan Lal,B. A. Stewart,2018-09-03 Climate is a soil forming factor and soil can mitigate climate change through a reduction in the emissions of greenhouse gases and sequestration of atmospheric CO₂ Thus there is a growing interest in soil management practices capable of mitigating climate change and enhancing environmental quality Soil and Climate addresses global issues through soil management and outlines strategies for advancing Sustainable Development Goals SDGs This volume in the Advances in Soil Science series is specifically devoted to describe state of the knowledge regarding the climate soil nexus in relation to Soil Processes weathering decomposition of organic matter erosion leaching salinization biochemical transformations gaseous flux and elemental cycling Soil Properties physical chemical biological and ecological Atmospheric Chemistry gaseous concentrations of CO₂ CH₄ N₂O water vapors soot dust and particulate matter Mitigation and Adaptation source and sink of GHGs CO₂ CH₄ N₂O land use and soil management soil C sink capacity permafrost Soil Management sequestration of organic and inorganic C nutrient requirements water demands coupled cycling of H₂O N P S and Policy and Outreach carbon farming payments for ecosystem services COP21 SDGs land degradation neutrality Special topics on soil as a source or sink of CO₂ silicate weathering and carbon sequestration nutrients required for carbon sequestration physical protection and the mean resident time and predicting soil carbon stocks are discussed in detail throughout the book **Leveraging Gender, Youth and Social Networks for Inclusive and Transformative Livestock Production in the Tropics and Subtropics** Stefan Burkart,Renee Marie Bullock,Juan Andrés Cardoso Arango,Marcela Ramos ,Natalia Triana Angel,2024-10-14 Social research has provided critical insights into understanding gender and generational gaps and the ways that power relations create differentiated access to agricultural and livestock technologies and services Many of these technologies and services such as improved feed options grass legume associations silvo pastoral systems improved animal genetics health and welfare grazing management and associated water and soil health and manure management have the potential to improve livelihoods sustainability food security and generational transfer dynamics Their adoption contributes to mitigating many of the impacts the livestock sector has on the environment through for example reducing greenhouse gas emissions and deforestation increasing biodiversity restoration and land sparing Likewise their adoption helps producers adapt to climate change Inequality – the unbeatable challenge Medani P.
