Augustine's Early Theology of the Church David C. Alexander, 2008 The nature and development of Augustine's understanding of the church between his conversion 386 and his forced entry into the clergy 391 provides an essential lens to understanding this seminal period of transition and the foundations of his future ecclesial contributions Even so most studies of Augustine's ecclesiology bypass this period starting with the clerical Augustine post 391 In fact research on the young Augustine and the Confessions too often stalls over debates between his neo Platonic or Christian orientation focusing on dichotomies in Augustine or an individualistic Augustine too rigidly labeled This book helps fill these gaps and provides a case study supporting arguments for continuity between the young and the clerical Augustine A careful chronological textual approach to Augustine's early Christian years demonstrates how his ecclesiological thought began during this period and comprised a core component of his first theological synthesis The emergence of his ecclesiological ideas was intimately intertwined with his overall personal religious philosophic and theological development As such it is crucial to our biographical and theological understanding of the great North African and will be of interest to specialists and students alike of Augustine's development Confessions mature ecclesiology and the late antique world
