Living Downstream A Scientists Personal Investigation Of Cancer And The Environment:

Living Downstream Sandra Steingraber, 2010-03-23 Sandra Steingraber biologist poet and survivor of cancer in her twenties brings all three perspectives to bear on the most important health and human rights issue of our time the growing body of evidence linking cancer to environmental contaminations Her scrupulously researched scientific analysis ranges from the alarming worldwide patterns of cancer incidence to the sabotage wrought by cancer promoting substances on the intricate workings of human cells In a gripping personal narrative she travels from hospital waiting rooms to hazardous waste sites and from farmhouse kitchens to incinerator hearings bringing to life stories of communities in her hometown and around the country as they confront decades of industrial and agricultural recklessness Living Downstream is the first book to bring together toxics release data now finally made available through under the right to know laws and newly released cancer registry data Sandra Steingraber is also the first to trace with such compelling precision the entire web of connections between our bodies and the ecological world in which we eat drink breathe and work Her book strikes a hopeful note throughout for while we can do little to alter our genetic inheritance we can do a great deal to eliminate the environmental contributions to cancer and she shows us where to begin Living Downstream is for all readers who care about the health of their families and future generations Sandra Steingraber's brave clear and careful voice is certain to break the paralyzing silence on this subject that persists more than three decades after Rachel Carson's great early warning **Living**

Nicolopoulou-Stamati, Luc Hens, 2004-03-31 Controversial topic because many of the proposed solutions or policies may damage the economy in the short term in order to reap health benefits which will only become apparent several decades in the future Each chapter is written by experts in the field throughout the world **The Rise of the U.S. Environmental**

Health Movement Kate Davies, 2023-06-14 Tells the story of anger disillusionment and determination of Americans to develop a political movement to fight chemical pollution timely The Huffington Post This book named one of Booklist's Top 10

books on sustainability in 2014 is the first to offer a comprehensive examination of the environmental health movement which unlike many parts of the environmental movement focuses on ways toxic chemicals and other hazardous agents in the environment effect human health and well being Born in 1978 when Lois Gibbs organized her neighbors to protest the health effects of a toxic waste dump in Love Canal New York the movement has spread across the United States and throughout the world By placing human health at the center of its environmental argument this movement has achieved many victories in community mobilization and legislative reform In *The Rise of the U S Environmental Health Movement* environmental health expert Kate Davies describes the movement s historical ideological and cultural roots and analyzes its strategies and successes Kate Davies excellent book focuses on the role of health in the environmental health movement and encourages us to consider its origins and accomplishments *The Rise of the U S Environmental Health Movement* looks both back and forward to challenge us to consider our current direction In the future this book will provide readers with an important perspective on how the environmental health movement shaped our society *Toxipedia* A well done history of America s environmental health movement offers readers valuable information on how grassroots organizing prevents harm from toxic exposures and leads to safe and healthy communities Lois Marie Gibbs Executive Director Center for Health Environment Justice

21st Century Sociology: A Reference Handbook Clifton D. Bryant, Dennis L. Peck, 2007 Publisher Description

Globalization and the Environment, 2006-06-01 What is missing in the mounting literature on globalization is a focused theoretical foundation with parallel empirical examinations of global structures and their environmental consequences The articles in this volume examine how the world economy and related non economic forms of global structuring impact the natural environment and the living conditions of human populations living across the globe Environmental dynamics in areas as diverse as Ancient Egypt and the Modern Amazon are presented for readers who are new to the world systems approach and for others interested in recent efforts to link environmental outcomes and antecedents to global processes

The Routledge International Handbook of Economic Sociology Milan Zafirovski, 2023-05-12 This handbook presents a systematic and comprehensive overview of economic sociology an exemplary interdisciplinary field which draws on theoretical frameworks and empirical findings from both economics and sociology to present a unique lens on the interdependence of the economy and society The handbook is arranged in four parts which together present the current state of the art of economic sociology as well as pointing toward future directions for research The first part outlines the theoretical foundations of economic sociology and its relations to other fields particularly with regard to other alternative approaches to economics and looks at conceptions and definitions of economic sociology vary The second part provides an overview of the historical development of economic sociology from classical political economy to the present day The third part explores the main problematics of economic sociology analyzing the economy in relation to particular social institutions the state ideology culture and art religion gender race ethnicity and more The fourth part focuses on the principal branches including sociology

of the market industrial organization and work uncertainty distribution and inequality money and finance and the environment The stellar international cast of contributors is drawn from both economics and sociology therefore presenting a holistic view of the field and contributing to a rejuvenation of economic sociology within economics It is an indispensable reference work for researchers and students across a broad range of sociological and economic disciplines **Kitchen Literacy** Ann Vileisis, 2007-10-24 Ask children where food comes from and they'll probably answer the supermarket Ask most adults and their replies may not be much different Where our foods are raised and what happens to them between farm and supermarket shelf have become mysteries How did we become so disconnected from the sources of our breads beef cheeses cereal apples and countless other foods that nourish us every day Ann Vileisis's answer is a sensory rich journey through the history of making dinner Kitchen Literacy takes us from an eighteenth century garden to today's sleek supermarket aisles and eventually to farmer's markets that are now enjoying a resurgence Vileisis chronicles profound changes in how American cooks have considered their foods over two centuries and delivers a powerful statement what we don't know could hurt us As the distance between farm and table grew we went from knowing particular places and specific stories behind our foods origins to instead relying on advertisers' claims The woman who raised plucked and cooked her own chicken knew its entire life history while today most of us have no idea whether hormones were fed to our poultry Industrialized eating is undeniably convenient but it has also created health and environmental problems including food borne pathogens toxic pesticides and pollution from factory farms Though the hidden costs of modern meals can be high Vileisis shows that greater understanding can lead consumers to healthier and more sustainable choices Revealing how knowledge of our food has been lost and how it might now be regained Kitchen Literacy promises to make us think differently about what we eat **Taking Stock** Francis T. Cullen, 2017-07-05 Criminology is in a period of much theoretical ferment Older theories have been revitalized and newer theories have been set forth The very richness of our thinking about crime however leads to questions about the relative merits of these competing paradigms Accordingly in this volume advocates of prominent theories are asked to take stock of their perspectives Their challenge is to assess the empirical status of their theory and to map out future directions for theoretical development ***Pesticides, A Love Story*** Michelle Mart, 2018-01-26 Presto No More Pests proclaimed a 1955 article introducing two new pesticides miracle workers for the housewife and back yard farmer Easy to use effective and safe who wouldn't love synthetic pesticides Apparently most Americans did and apparently still do Why in the face of dire warnings rising expense and declining effectiveness do we cling to our chemicals Michelle Mart wondered Her book a cultural history of pesticide use in postwar America offers an answer America's embrace of synthetic pesticides began when they burst on the scene during World War II and has held steady into the 21st century for example more than 90% of soybeans grown in the US in 2008 are Roundup Ready GMOs dependent upon generous use of the herbicide glyphosate to control weeds Mart investigates the attraction of pesticides with their up to the minute promise of modernity sophisticated

technology and increased productivity in short their appeal to human dreams of controlling nature She also considers how they reinforced Cold War assumptions of Western economic and material superiority Though the publication of Rachel Carson's *Silent Spring* and the rise of environmentalism might have marked a turning point in Americans' faith in pesticides statistics tell a different story *Pesticides a Love Story* recounts the campaign against DDT that famously ensued but the book also shows where our notions of *Silent Spring*'s revolutionary impact falter where in spite of a ban on DDT farm use of pesticides in the United States more than doubled in the thirty years after the book was published As a cultural survey of popular and political attitudes toward pesticides *Pesticides a Love Story* tries to make sense of this seeming paradox At heart it is an exploration of the story we tell ourselves about the costs and benefits of pesticides and how corporations government officials ordinary citizens and the press shape that story to reflect our ideals interests and emotions *From Apocalypse to Way of Life* Frederick Buell, 2004-03 *From Apocalypse to Way of Life* is a comprehensive and in depth survey of environmental crisis as it has been understood for the last four decades Buell recounts the growing number of ecological and social problems critical for the environment and the impact that the growing experience with and understanding of them has had on American politics society and culture **Rachel Carson** Karen F. Stein, 2013-02-11 Karen F Stein University of Rhode Island Kingston USA Rachel Carson is the twentieth century's most significant environmentalist Her books about the sea blend science and poetry as they invite readers to share her celebration of the ocean's wonders *Silent Spring* her graphic and compelling exposé of the damage caused by the widespread aerial spraying of persistent organic pesticides such as DDT opened our eyes to the interconnectedness of all living beings and the ecological systems we inhabit Carson's work challenges our belief that science and technology can control the natural world asks us to recognize our place in the world around us and inspires us to treat the earth respectfully She calls us to rekindle our sense of wonder at nature's power and beauty and to tread lightly on the earth so that it will continue to sustain us and our descendants This book guides readers on a journey through Carson's life and work considers Carson's legacies and points to some of the continuing challenges to sustainability It provides a listing of resources for reading learning or teaching about the environment about nature writing and about Carson and the crucial issues she addressed **Fractivism** Sara Ann Wylie, 2018-01-25 From flammable tap water and sick livestock to the recent onset of hundreds of earthquakes in Oklahoma the impact of fracking in the United States is far reaching and deeply felt In *Fractivism* Sara Ann Wylie traces the history of fracking and the ways scientists and everyday people are coming together to hold accountable an industry that has managed to evade regulation Beginning her story in Colorado Wylie shows how nonprofits landowners and community organizers are creating novel digital platforms and databases to track unconventional oil and gas well development and document fracking's environmental and human health impacts These platforms model alternative approaches for academic and grassroots engagement with the government and the fossil fuel industry A call to action *Fractivism* outlines a way forward for not just the fifteen million Americans who live

within a mile of an unconventional oil or gas well but for the planet as a whole

Breast Cancer NA NA, 2016-09-23 Breast Cancer Society Shapes an Epidemic provides an innovative look at the social and political contexts of breast cancer and examines how this illness has become a social problem This is not a book about breast cancer as a biological disease its diagnosis and treatment or the latest research to cure it Rather it looks at how economics politics gender social class and race ethnicity have deeply influenced the science behind breast cancer research spurred the growth of a breast cancer industry generated media portrayals of women with the disease and defined and influenced women s experiences with breast cancer The contributors address the social construction of breast cancer as an illness and as an area of scientific controversy advocacy and public policy Chapters on the history of breast cancer the health care system the environment and the marketing of breast cancer among others tease apart the complex social forces that have shaped our collective and individual responses to breast cancer

Readings in Rhetorical Fieldwork Samantha Senda-Cook, Aaron Hess, Michael Middleton, Danielle Endres, 2018-09-05 Readings in Rhetorical Fieldwork compiles foundational articles highlighting the development of fieldwork in rhetorical criticism Presenting a wide variety of approaches the volume begins with a section establishing the starting points for the development of fieldwork in rhetorical criticism and then examines five topics Space Public Memory Publics and Counterpublics Advocacy and Activism and Science Technology and Medicine Within these sections readers evaluate a full spectrum of methods from interviews to oral histories to participant observation This volume is invaluable for advanced undergraduate and graduate students of rhetorical criticism rhetorical fieldwork and qualitative methods looking for a comprehensive overview of the development of rhetorical fieldwork

Toward a Bioregional State Mark D. Whitaker, 2005 Environmental sociologist Mark D Whitaker is a comparative historical researcher on the politics of environmental degradation and sustainability Toward A Bioregional State is his novel approach to development and to sustainability He proposes that instead of sustainability being an issue of population scale managerial economics or technocratic planning an overhaul of formal democratic institutions is required This is because environmental degradation has more to do with the biased interactions of formal institutions and informal corruption Because of corruption we have environmental degradation Current formal democratic institutions of states are forms of informal gatekeeping and as such intentionally maintain democracy as ecologically out of sync He argues that we are unable to reach sustainability without a host of additional ecological checks and balances These ecological checks and balances would demote corrupt uses of formal institutions by removing capacities for gatekeeping against democratic feedback Sustainability is a politics that is already here only waiting to be formally organized

Dodging the Toxic Bullet David R. Boyd, 2010-03-01 Dodging the Toxic Bullet presents workable strategies that show how we can live longer healthier lives by breathing clean air eating healthy food drinking safe water and using non toxic products Author David R Boyd provides accessible background on a range of hazards including mercury in fish carcinogens in cleaning products lead in toys and lethal E coli in ground beef His clear directions

for reducing risk include growing lots of houseplants choosing whole foods avoiding consumer products with strong or long lasting smells and using green cleaning products Easy to follow advice and informative sidebars and checklists make this a must have guide especially for parents of infants and children **Configuring Health Consumers** R. Harris,N. Wathen,S. Wyatt,2010-10-27 This book explore assumptions underpinning contemporary health policy discourses that emphasize personal responsibility for health consider how they attach to changing information technologies and discuss their influence on emerging forms of health work *Developing Ecological Consciousness* Christopher Uhl,2020-01-09 Developing Ecological Consciousness is a unique environmental studies textbook Rather than working through a list of environmental problems it aims to help students become aware of the awe and wonder of our planet understand some of the challenges facing it and explore possibilities for action and change This text is invaluable for courses in a variety of disciplines including environmental studies biology sociology and political science
