The Philosophy of Environmental Emotions Ondřej Beran, Laura Candiott, Niklas Forsberg, Antony Fredriksson, David Rozen, 2024-12-09 This volume presents new philosophical perspectives on environmental emotions It explores the motivating nature of emotions such as anger grief and hope in relation to the current climate crisis Many of our emotional responses to the climate crisis take a distressed form like anxiety despair or grief However these emotions almost always coexist with hope a drive toward action or a strengthened sense of relationality and belonging This book explores the different levels at which these tensions take place Part I discusses the conceptual and

linguistic notions we use to make sense of our ecological predicament Part II looks at the embedded dimension of our emotions how we feel about the climate crisis as members of our communities and how our emotions are interconnected with what we do and how we work in and for our communities Several chapters in this section explicitly discuss hope Finally Part III has a phenomenological and existential focus it explores the nature of the rootedness and how it shapes our emotional experiences during the climate crisis The Philosophy of Environmental Emotions will appeal to scholars and graduate students working in environmental philosophy philosophy of emotion and environmental psychology [Living More with Less, 30th Anniversary Edition](#) Doris Longacre, 2010-11-01 In 1980 before living simply and green became trendy and popular Doris Janzen Longacre author of the enormously popular More with Less Cookbook over 900 000 sold wrote Living More with Less a practical guide for living in simple sustainable and healthy ways ways that keep the future of the planet and the plight of poor people in mind Thirty years later Living More with Less 30th Anniversary Edition is being released as a way to celebrate and honor Longacre's foresight and vision and to pass on her vision for simple and sustainable living to a new generation Revised and updated by Valerie Weaver Zercher this 30th anniversary edition is true to author Doris spirit of living in ways that keeps poor people God's creation and each other in mind and is loaded with new and practical tips in areas such as money travel clothing housing celebrations and recreation Living More with Less 30th Anniversary Edition collects the wisdom and experience of those who live with less than a consumer culture says we need With stories reflections and advice from people around the world who are making changes to their daily habits in response to climate change and global poverty Living More with Less 30th Anniversary Edition is a vibrant collection of testimonies old and new of those who are discovering the joy of living with enough Valerie Weaver Zercher editor Check out the article Living More with Less An Idea Whose Time Has Come Again at Publishers Weekly Endorsements This book was decades ahead of its time and is just as relevant today as it was thirty years ago It is like a cookbook for life Shane Claiborne author of The Irresistible Revolution speaker and activist This message is even more important than it was thirty years ago Herein lies sound advice for living sensibly Bill McKibben author of Eaarth Making a Life on a Tough New Planet This timely revised and updated edition is exceptionally wise urgently necessary for the sake of saving our planet pertinently and personally practical Who could not but rave about this book Marva Dawn author of Unfettered Hope Being Well When We're Ill and Keeping the Sabbath Wholly Living More with Less is about a way of living rooted in the Christian faith Our planet is groaning and we desperately need the kind of thoughtful essays and tips in this book to show us the way forward Ron Sider founder and president of Evangelicals for Social Action Read the complete list of endorsements Click here for more about Living More with Less including sample tips ideas additional resources and more Click here for more about Doris Janzen Longacre including poems journal entries her final sermon and more Free downloadable study guide available here **World Design Science**

Decade: Phase 1 Document 6 R. Buckminster Fuller, The documents in this series originated with a proposal made by R

Buckminster Fuller to the International Union of Architects I U A at their VIIth Congress in London England in July 1961 launching the World Design Science Decade He proposed then that the architectural schools around the world be encouraged by the I U A to invest the next ten years in a continuing problem of how to make the total world s resources which in 1961 serve only 40% serve 100% of humanity through competent design despite a continuing decrease of metal resources per capita In essence The World Design Science Decade series of documents suggests in great detail ways in which world architectural schools and specifically their students should initiate and assume The Design Science Decade The total series includes many of Fuller s most prescient ideas A note from the series editor John McHale Though the language of some of the texts may seem difficult at first approach it should be borne in mind that one of our major problems in thinking today 1965 is the use of language systems which still represent a fixed structurally compartmentalized world view The terms available to us for the expression of dynamic rather than static concepts are far from satisfactory Fuller s language is particularly representative of the transitional state of the western world between the older traditional noun centered culture to its present day changing verb centered culture In his search for an adequately descriptive terminology he tends to employ concepts and usages from many different fields juxtaposed in ways which may be unfamiliar to those more customarily restrained within the vocabularies of particular disciplines Description by the Buckminster Fuller Institute courtesy of The Estate of R Buckminster Fuller *LIVE WITH LESS, ENJOY MORE* Unknown,2025-10-10 Do you ever feel like your life is overflowing with things responsibilities and noise yet somehow lacking peace and meaning This book is your guide to breaking free from the weight of excess and rediscovering what truly matters Emilio Castillo invites you on a journey toward simplicity balance and inner fulfillment showing that true happiness doesn t come from having more but from living with intention Through inspiring reflections practical exercises and real life examples you ll learn how to declutter your spaces calm your mind and simplify your routines so that you can focus on what brings you real joy You ll discover how to let go of material emotional and mental clutter replacing it with clarity calm and purpose This is not just a book about minimalism it s about conscious living Castillo teaches you how to align your daily choices with your values create more time for what nourishes your soul and free yourself from the constant rush of modern life Each chapter offers tools to help you slow down live more intentionally and cultivate gratitude for the present moment Live With Less Enjoy More is a practical and emotional roadmap to finding freedom in simplicity It will help you design a lighter more meaningful life one built on clarity balance and authentic happiness Because when you let go of what doesn t matter you finally make space for what does **The Age of Em** Robin Hanson,2016-05-19 Robots may one day rule the world but what is a robot ruled Earth like Many think the first truly smart robots will be brain emulations or ems Scan a human brain then run a model with the same connections on a fast computer and you have a robot brain but recognizably human Train an em to do some job and copy it a million times an army of workers is at your disposal When they can be made cheaply within perhaps a century ems will displace humans in most

jobs In this new economic era the world economy may double in size every few weeks Some say we can't know the future especially following such a disruptive new technology but Professor Robin Hanson sets out to prove them wrong Applying decades of expertise in physics computer science and economics he uses standard theories to paint a detailed picture of a world dominated by ems While human lives don't change greatly in the em era em lives are as different from ours as our lives are from those of our farmer and forager ancestors Ems make us question common assumptions of moral progress because they reject many of the values we hold dear Read about em mind speeds body sizes job training and career paths energy use and cooling infrastructure virtual reality aging and retirement death and immortality security wealth inequality religion teleportation identity cities politics law war status friendship and love This book shows you just how strange your descendants may be though ems are no stranger than we would appear to our ancestors To most ems it seems good to be an em
