Diffraction Reading Kai Merten, 2021-05-27 Putting the New Materialist figure of diffraction to use in a set of readings in which cultural texts are materially read against their contents and their themes against their readers or against other texts this volume proposes a critical intervention into the practice of reading itself In this book reading and reading methodology are probed for their materiality and re considered as being inevitably suspended between or diffracted with both matter and discourse The history of literary and cultural reading including poststructuralism and critical theory is revisited in a new light and opened up for a future in which the world and reading are no longer regarded as conveniently separate spheres but recognized as deeply entangled and intertwined *Diffraction Reading* ultimately represents a new reading of reading itself firstly by critiquing the distanced perspective of critical paradigms such as translation and intertextuality in which texts encountered processed or otherwise subdued secondly showing how all literary and cultural readings represent different agential cuts in the world text reader constellation which is always both discursive and material and thirdly the volume materializes dynamizes and politicizes the activity of reading by drawing attention to reading's intervention in and co creation of the world in which we live

Metagnosis Danielle Spencer, 2020-10-27 Bridging memoir with key concepts in narratology philosophy and history of medicine and disability studies this book identifies and names the phenomenon of metagnosis the experience of learning in adulthood of a longstanding condition It can occur when the condition has remained undetected e g colorblindness and or when the diagnostic categories themselves have shifted e g ADHD More broadly it can occur with unexpected revelations bearing upon selfhood such as surprising genetic test results Though this phenomenon has received relatively scant attention learning of an unknown condition is often a significant and bewildering revelation one that subverts narrative expectations and customary categories How do we understand these revelations In addressing this topic Danielle Spencer approaches narrative medicine as a robust research methodology comprising interdisciplinarity narrative attentiveness and the creation of writerly texts Beginning with Spencer s own experience the book explores the issues raised by metagnosis from communicability to narrative intelligibility to different ways of seeing Next it traces the distinctive metagnostic narrative arc

through the stages of recognition subversion and renegotiation discussing this trajectory in light of a range of metagnostic experiences from Blade Runner to real world mid life diagnoses Finally it situates metagnosis in relation to genetic revelations and the broader discourses concerning identity Spencer proposes that better understanding metagnosis will not simply aid those directly affected but will serve as a bellwether for how we will all navigate advancing biomedical and genomic knowledge and how we may fruitfully interrogate the very notion of identity *Elusive Brain* Jason

Tougaw,2018-04-24 Featuring a foreword by renowned neuroscientist Joseph E LeDoux The Elusive Brain is an illuminating comprehensive survey of contemporary literature s engagement with neuroscience This fascinating book explores how literature interacts with neuroscience to provide a better understanding of the brain s relationship to the self Jason Tougaw surveys the work of contemporary writers including Oliver Sacks Temple Grandin Richard Powers Siri Hustvedt and Tito Rajarshi Mukhopadhyay analyzing the way they experiment with literary forms to frame new views of the immaterial experiences that compose a self He argues that their work offers a necessary counterbalance to a wider cultural neuromania that seeks out purely neural explanations for human behaviors as varied as reading economics empathy and racism Building on recent scholarship Tougaw s evenhanded account will be an original contribution to the growing field of neuroscience and literature
