convincing and grounded in contemporary behavioral science theory Beginning with the assertion that equality of educational opportunity depends on access to experiences that are sufficiently appropriate and rich to enable the achievement of diverse human potentials she provides a comprehensive school design for intervention that demonstrates how to achieve it Grounded in recent advances in learning science McCallister asserts three necessary conditions for learning the need for learners to have access to diverse rich environmental experiences the need for them to enjoy fundamental freedom and autonomy to direct their own learning and access to full and free forms of association In her model these conditions provide what is necessary for learners to coordinate their minds with others to develop their identities personalities and talents These conditions are animated in concrete procedures that can be adapted to a wide variety of populations in formal informal and remote educational settings The procedures take the form of rules that learners comply with in the exercise of their freedom When they are followed the rules provide a grammar for the social norms that govern the moral worlds of learners and compel them to flourish Tested over two decades in her work as a teacher scholar and school reformer in more than 20 NYC public schools the McCallister Method has delivered an innovative and disruptive approach to schooling that has proven successful in finally transforming low performing industrial schools into 21st century learning organizations Online support material includes assessments records surveys and more to be used in school design and classroom settings

State Assessment Policy and Practice for English Language Learners Charlene Rivera, Eric Collum, 2014-05-12 State Assessment Policy and Practice for English Language Learners presents three significant studies each examining a different aspect of states strategies for including English language learners in state assessments an Analysis of State Assessment Policies Regarding Accommodations for English Language Learners a Survey and Description of Test Translation Practices and an Examination of State Practices for Reporting Participation and Performance of English Language Learners in State Assessments With the rise in population of English language learners and the subsequent stepped up legislative focus on this student population over the past decade states have been challenged to include English language learners in state assessment programs Until now the little data available on states policies and practices for meeting this challenge has been embedded in various reports and professional journals and scattered across the Internet This volume offers for the first time a focused examination of states assessment policies and practices regarding English language learners The three studies were supported by OELA the U S Department of Education s Office of English Language Acquisition Language Enhancement and Academic Achievement for Limited English Proficient Students State Assessment Policy and Practice for English Language Learners is of interest to researchers and professionals involved with the assessment of English language learners state and district level policy makers and academics teacher educators and graduate students in a number of fields including educational and psychological assessment testing and measurement bilingual education English as a second language and second language acquisition *Atlas of Material Worlds* Matthew Seibert, 2021-08-17 Atlas of Material Worlds is a highly

designed narrative atlas illustrating the agency of nonliving materials with unique ubiquitous and often hidden influence on our daily lives Employing new materialism as a jumping off point it examines the increasingly blurry lines between the organic and inorganic engaging the following questions What roles do nonliving materials play Might a closer examination of those roles reveal an undeniable agency we have long overlooked or disregarded If so does this material agency change our understanding of the social structures ecologies economies cosmologies technologies and landscapes that surround us And perhaps most importantly why does material agency matter This is the story of the world s driest nonpolar desert pink flamingos and cerulean blue lithium ponds industrial shipping logistics pudding like jiggling substrates and monuments of mud galactic bodies radioactive sheep and the yellowcake of uranium Put simply this book dares readers to see the world anew from material up Atlas of Material Worlds offers this new relationship to our host environment in a time of mounting crises accelerating climate change ballooning socioeconomic inequality and rising toxic nationalism uniquely telling materialist stories for practitioners and students in landscape architecture and other built environment disciplines

Official Florida Statutes Florida,2014 How To Do Politics With Art Violaine Roussel,Anurima Banerji,2016-10-26 A major issue in the relation of art to the rest of society is the question of how art penetrates politics From the perspective of most art scholars this is a question of aesthetics whether politics necessarily pollutes and debases the quality of the arts From the perspective of social science it has been primarily a question of meaning how political messages are conveyed through artistic media Recent work has begun to broaden the study of the arts and politics beyond semiosis and content focus Several strands of scholarship are converging around the general issue of the social relationships within which art takes political form that is how art and artists do politics This perspective of doing moves analysis beyond addressing the meaning of culture to focus on the ways that art is embedded in and intervenes in social relationships activities and institutions This volume brings together an interdisciplinary group of scholars from France and the United States to investigate these directions and themes by exploring the question of how to do politics with art from a comparative standpoint putting sociological approaches in conversation with other disciplinary prisms It will be of interest to scholars of social movements and politicization the sociology of art art history and aesthetics **Toxic Sexual Politics** Melina Packer,2025-01-28 A bold expos of how the very foundation of toxicology has been contaminated by sexist and racist ideologies The first critical understanding of the field of toxicology from a feminist and antiracist perspective Toxic Sexual Politics asserts that the science of toxicants must be held accountable for the uneven distribution of toxic pollution along racial and sexual lines Drawing upon in depth interviews and extensive ethnographic and archival research including participant observations in toxicology classrooms conferences and laboratories Melina Packer urges environmental health advocates to place toxicant science within its masculinist militarist and eugenicist history Toxic Sexual Politics shows how the founding fathers of U S toxicology were ideologically aligned with the chemical industry inventing a science that could

make chemicals safe as opposed to one that could adequately protect planetary health from toxicants hazards While many toxicologists today are critical of the chemical industry they continue to rely on the highly limited tools of toxicology as accurate measures of toxicity as do government regulators the courts and environmental advocates Unlike most critiques of the chemical industry and narratives of environmental health movements Toxic Sexual Politics refuses to take the science at face value By focusing on the sexist racist and ableist biases reinforced by toxicology Packer powerfully argues that this scientific discipline reproduces the very same white supremacist and heterosexist logics that generated environmental injustices in the first place The field of toxicology can explicitly confront chemical corporate power by building from queer feminist anti ableist and antiracist movements for environmental and reproductive justice **Asian American Film**

Festivals Erin Franziska Högerle, 2020-10-26 Responding to a lack of studies on the film festival's role in the production of cultural memory this book explores different parameters through which film festivals shape our reception and memories of films By focusing on two Asian American film festivals this book analyzes the frames of memory that festivals create for their films constructed through and circulated by the various festival media It further establishes that festival locations both cities and screening venues play a significant role in shaping our experience of films Finally it shows that festivals produce performances which help guide audiences towards certain readings and direct the film's role as a memory object Bringing together film festival studies and memory studies Asian American Film Festivals offers a mixed methods approach with which to explore the film festival phenomenon thus shedding light on the complex dynamics of frames locations and performances shaping the festival's memory practices It also draws attention to the understudied genre of Asian American film festivals showing how these festivals actively engage in constructing and performing a minority group's collective identity and memory Europe's Justice Deficit? Dimitry Kochenov, Gráinne de Búrca, Andrew Williams, 2015-04-30 The gradual legal and political evolution of the European Union has not thus far been accompanied by the articulation or embrace of any

substantive ideal of justice going beyond the founders intent or the economic objectives of the market integration project This absence arguably compromises the foundations of the EU legal and political system since the relationship between law and justice a crucial question within any constitutional system remains largely unaddressed This edited volume brings together a number of concise contributions by leading academics and young scholars whose work addresses both legal and philosophical aspects of justice in the European context The aim of the volume is to appraise the existence and nature of this deficit its implications for Europe's future and to begin a critical discussion about how it might be addressed There have been many accounts of the EU as a story of constitutional evolution and a system of transnational governance but few which pay sustained attention to the implications for justice The EU today has moved beyond its initial and primary emphasis on the establishment of an Internal Market as the growing importance of EU citizenship and social rights suggests Yet most legal analyses of the EU treaties and of EU case law remain premised broadly on the assumption that EU law still largely serves

the purpose of perfecting what is fundamentally a system of economic integration The place to be occupied by the underlying substantive ideal of justice remains significantly underspecified or even vacant creating a tension between the market oriented foundation of the Union and the contemporary essence of its constitutional system The relationship of law to justice is a core dimension of constitutional systems around the world and the EU is arguably no different in this respect The critical assessment of justice in the EU provided by the contributions to this book will help to create a fuller picture of the justice deficit in the EU and at the same time open up an important new avenue of legal research of immediate importance

Geopolitics and the Event Alan Ingram, 2019-08-19 An original exploration of the 2003 Iraq war and geopolitics more broadly through the prism of art Offers a reappraisal of one of the most contentious and consequential events of the early twenty first century Advances an original perspective on Britain's role in the 2003 invasion and subsequent occupation of Iraq Maps out new ways of thinking about geopolitical events through art Examines the work of artists curators and activists in light of Britain's role as a colonial power in Iraq and the importance of oil Reflects on the significance limits and dilemmas of art as a form of critical intervention Questions the implications of art in colonialism and modernity *Negotiating Race and Rights in the Museum* Katy Bunning, 2020-11-29 Negotiating Race and Rights in the Museum traces the evolution of pervasive racial ideas and post race allusions over more than a century of museum thinking and practice Drawing on the illuminating history of the Smithsonian Institution this book offers an account of how museums have addressed and renegotiated wider calls for inclusion self definition and racial justice in ways that continually re centre and legitimise the White frame Charting the emergence of post race ideas in museums Bunning demonstrates how and why culturally specific approaches have been met with suspicion and derision by powerful museum stakeholders against the backdrop of a changing United States of America just as they have offered crucial vehicles for sectoral change This study of the evolution of racial ideas in response to Black empowerment highlights deeply entrenched forms of White supremacy that remain operative within the international museum sector today and serves to reinforce the urgent calls for the active disruption of racist ideas and the redesign of institutions Negotiating Race and Rights in the Museum will appeal to those working in the international fields of museum and heritage studies cultural studies and American studies and all who are interested in the production of racial ideas and White supremacy in the museum **Monthly Catalog of United States Government Publications**

United States. Superintendent of Documents, 1958 *Rough Country* Robert Wuthnow, 2014-08-10 How the history of Texas illuminates America's post Civil War past Tracing the intersection of religion race and power in Texas from Reconstruction through the rise of the Religious Right and the failed presidential bid of Governor Rick Perry *Rough Country* illuminates American history since the Civil War in new ways demonstrating that Texas's story is also America's In particular Robert Wuthnow shows how distinctions between us and them are perpetuated and why they are so often shaped by religion and politics Early settlers called Texas a rough country Surviving there necessitated defining evil fighting it and building

institutions in the hope of advancing civilization Religion played a decisive role Today more evangelical Protestants live in Texas than in any other state They have influenced every presidential election for fifty years mobilized powerful efforts against abortion and same sex marriage and been a driving force in the Tea Party movement And religion has always been complicated by race and ethnicity Drawing from memoirs newspapers oral history voting records and surveys Rough Country tells the stories of ordinary men and women who struggled with the conditions they faced conformed to the customs they knew and on occasion emerged as powerful national leaders We see the lasting imprint of slavery public executions Jim Crow segregation and resentment against the federal government We also observe courageous efforts to care for the sick combat lynching provide for the poor welcome new immigrants and uphold liberty of conscience A monumental and magisterial history Rough Country is as much about the rest of America as it is about Texas **Yearbook of International**
