Llamando A Las Puertas Del Cielo Acantilado:

Ciencia y Filosofía Pedro Fernández Liria, 2018-01-15 La ciencia contemporánea revoluciona el pensamiento humano Ciencia y Filosofía nos propone un viaje fascinante por las sorprendentes implicaciones filosóficas de la ciencia contemporánea La última gran revolución en las ciencias físicas ha situado al pensamiento humano ante el reto más grande que jamás se le ha presentado y el autor del presente libro se esmera en proporcionar al lector las claves necesarias para comprender su alcance y para poder afrontarlo Ciencia y Filosofía es un concienzudo y documentado estudio capaz de cautivar tanto a filósofos y científicos como a cualquiera que sin una especial formación técnica y matemática se halle interesado por los últimos progresos tecnológicos de la ciencia y por las conclusiones filosóficas de la revolución científica que provocaron las dos grandes teorías físicas del siglo XX la teoría de la relatividad y la mecánica cuántica Además de exponer el carácter esencial de ambas teorías el libro discute algunas de las interpretaciones que se han hecho de las mismas y repasa algunos de los debates y controversias que su aparición ha suscitado en los últimoscientíficos tanto entre los propios científicos como entre los filósofos Por lo demás Ciencia y Filosofía es un libro que podrá y nos atreveremos a decir que deberá interesar a cualquiera que sienta una pasión por la ciencia como la que el propio autor trata de contagiar desde la primera página

El universo mental

Francesc Vieta, Mercè Ferriz, 2019-02-26 El universo físico no es la única realidad hay también un universo mental Ambos universos son la esencia de la realidad No son iguales pero forman parte de una simetría esencial Lo que conocemos del universo físico nos ayuda a entender mejor cómo funciona la mente ya que lo que conocemos y comprendemos de lo físico es un relato mental sobre aquello que aparentemente es de otra naturaleza La esperanza que nos guarda es que comprendiendo mejor ambos universos y su conexión logremos entenderlos mejor y guiamos de manera más pacífica y coherente nuestros movimientos relacionales como especie Para lograr tender puentes entre mente y universo entre pensamiento y materia energía hemos acudido a la física a la cosmología a la psicoanálisis a la neurociencia desde la antigüedad hasta el momento actual Y entonces hemos viajado al origen cósmico el nacimiento del universo Despues de aportar una nueva visión y comprensión del BANG y resuelto la duda existencial del ser o no ser y haber entendido que no hubo ni un huevo ni una gallina original nos hemos propuesto entender el espacio y el tiempo para poder despues captar de manera más profunda el

MOVIMIENTO físico y mental Move up Clotaire Rapaille, 2013-11-28 Por qué algunas culturas avanzan y otras no La vida es movimiento y la dirección de este movimiento es hacia arriba Si todos debemos movernos para sobrevivir vale la pena preguntarse qué factores de nuestro entorno nos impulsan a movernos y cuáles por el contrario nos detienen Por qué algunas personas tienen la oportunidad de moverse hacia donde quieren y otras no Por qué ciertas sociedades evolucionan y otras no Para responder a estas interrogantes los autores del libro estudiaron los códigos culturales y el comportamiento Biológico de 71 países para desarrollar un índice de que permite medir la movilidad social dentro de estas sociedades Andrés Roemer y Clotaire Rapaille señalan que las culturas más exitosas son aquellas que han sabido preservar los mejores aspectos de su

tradición al mismo tiempo que han estado dispuestas a innovar y buscar nuevos horizontes Se trata de sociedades abiertas al cambio y sin temor al statu quo Otra clave del xito evolutivo de las sociedades es el equilibrio entre el aspecto biológico determinado por cuatro factores supervivencia sexo seguridad y superación y el aspecto cultural El reto concluyen los autores es aprender a armonizar nuestros instintos nuestro cerebro reptiliano con nuestras emociones nuestro cerebro lóbico y nuestra lógica el neocórtex **La teoría de los muchos mundos** Christopher Edge,2017-05-03 Hasta donde irás para intentar cambiar el mundo La divertida aventura de Albie en busca de su madre a través del espacio y del tiempo Cuando la madre de Albie muere apenas si es natural que lo pregunte a dónde ha ido Sus padres son científicos y siempre han tenido casi todas las respuestas Papá susita algo sobre la física cuántica y los universos paralelos y eso basta para que Albie se ponga manos a la obra consiga una caja un ordenador y un planeta semipodrido y se envíe a sí mismo a través del espacio y del tiempo en busca de su madre Lo que descubre tal vez no sea lo que estaba buscando pero sin duda le proporciona las respuestas a algunas de las preguntas más importantes Reseñas Un gran libro con un gran cerebro grandes risas y un gran corazón Frank Cottrell Boyce Superdivertida y entrañable Piers Torday autor de El último rebaño Prueba la teoría de que las novelas sobre ciencia pueden ser absolutamente divertidas The Times

Adnan II sultán de Bankara ya no es el hombre que diez años atrás vertió su sangre para vengar a su padre y recuperar la herencia que le había sido arrebatada. Ahora se debate entre el tedio y la frustración al ver que no puede convertir su pequeño y atrasado país en una de las modernas capitales occidentales que conoció en su juventud. La llegada al sultanato de un nuevo consul español y de su hija ser la distracción que precise para recordar viejos tiempos y olvidar sus problemas y los peligros que amenazan su vida y la de su familia. Beatriz Casanova sin embargo no está dispuesta a ser solo el nuevo juguete del sultán. Resignada a su destino de solterona decide entregarle a tan inesperada aventura y sucumbe al cortejo de Adnan aunque imponiendo sus propias reglas. Un regreso a la Bankara de la hija del consul a sus calles y bazares a su lujoso palacio y a la zona prohibida donde solo reina la voluntad del sultán.
