Frank Lloyd Wright Paul Laseau, James Tice, Frank Lloyd Wright, 1992 Despite the renewed interest in Frank Lloyd Wright and the increasing body of literature that has illuminated his career the deeper meaning of his architecture continues to be elusive His own writings are often interesting commentaries but tend not to enlighten us as to his design methodology and it is difficult to make the connection between his stated philosophy and his actual designs This book is a refreshing account that evaluates Wright s contribution on the basis of his architectural form its animating principle and consequent meaning Wright s architecture not his persona is the primary focus of this investigation This study presents a comprehensive overview of Wright s work in a comparative analytical format Wright s major building types have been identified to enable the reader to pursue a more systematic understanding of his work The conceptual and experiential order of each building group is demonstrated visually with specially developed analytical illustrations These drawings offer vital insights into Wright s exploration of form and underscore the connection between form and principle The implications of Wright s work for architecture in general serves as an important underlying theme throughout This volume also integrates the research of several noted scholars to clarify the interaction of theory and practice in Wright s work as well as the role of formal order in architectural experience in general By seeing how Wright integrates his intuitive and intellectual grasp of design the reader will build a keen awareness of the rational and coherent basis of his architecture and its symbiotic relationship with emotional qualitative reality A graphic taxonomy of plans of Wright s building designs helps the reader focus on specific subjects Among the diverse areas covered are sources and influences of Wright s work domestic themes and variations public buildings and skyscraper designs and the influence of site on design Complete with a

Zipf, 2020-12-30 New Deal Book Award 2022 Honourable Mention *Frank Lloyd Wright's Fallingwater* explores the relationship between the economic tumult in the United States in the 1930s, Frank Lloyd Wright, and the construction of his most famous house, Fallingwater. The book reinterprets the history of this iconic building, recognizing it as a Depression-era monument that stands as a testimony to what an American architect could achieve with the right site, client, and circumstance, even in desperate economic circumstances. Using newly available resources, author Catherine W. Zipf examines Wright's work before and after Fallingwater to show how it was influenced by the economic climate, public architectural projects of the Great Depression, and America's changing relationship with Modernist style and technology. He traces this influence in his art through Wright's explorations of primitivist sources, innovations in sculpture, and an intensification of the architect's use of ornament. Less tangible but as important as Wright's view of himself, his art, and society, Alofsin uncovers the European impact on the architect's image of himself as a The Urbanism of Frank Lloyd Wright Neil Levine, 2016 This is the first book devoted to Frank Lloyd Wright's designs for remaking the modern city. Stunningly comprehensive, *The Urbanism of Frank Lloyd Wright* presents a radically new interpretation of the architect's work and offers new and important perspectives on the history of modernism. Neil Levine places Wright's projects produced over more than fifty years within their historical, cultural, and physical contexts while relating them to the theory and practice of urbanism as it evolved over the twentieth century. Levine overturns the conventional view of Wright as an architect who deplored the city and whose urban vision was limited to a utopian plan for a network of agrarian communities he called Broadacre City. Rather, Levine reveals Wright's larger, more varied, interesting, and complex urbanism demonstrated across the span of his lengthy career.

Beginning with Wright's plans from the late 1890s through the early 1910s for reforming residential urban neighborhoods mainly in Chicago and continuing through projects from the 1920s through the 1950s for commercial mixed use civic and cultural centers for Chicago Madison Washington Pittsburgh and Baghdad Levine demonstrates Wright's place among the leading contributors to the creation of the modern city Wright's often spectacular designs are shown to be those of an innovative precursor and creative participant in the world of ideas that shaped the modern metropolis Lavishly illustrated with drawings plans maps and photographs this book features the first extensive new photography of materials from the Frank Lloyd Wright Foundation Archives *The Urbanism of Frank Lloyd Wright* will serve as one of the most important books on the architect for years to come *Icons of American Architecture* Donald Langmead, 2009-03-05 What turns a building into an icon What is it about some structures that makes their history and legend even more important than their original intended use making them a part of American and world popular culture Twenty four buildings and structures including the Brooklyn Bridge the White House the Hotel del Coronado and the Washington Monument are presented here along with their roles in fiction film music and the imagination of people worldwide Approximately twenty five images are included in the set along with sidebars featuring additional structures *The Architecture of Bart Prince* Christopher Curtis Mead, 1999 The only book on the exuberant work of a uniquely original American architect Bart Prince whose breathtaking buildings stand from Ohio to Hawaii is recognized internationally for embodying the American tradition of individualism personified by Louis Sullivan Frank Lloyd Wright and Bruce Goff *Fallingwater* Edgar Kaufmann, 1986 A personal record of Wright's domestic masterpiece a home which becomes an integral part of its natural setting **American Architectural History** Keith Eggner, 2004-07-31 Offering some 30 essays this volume concentrates on recent writings by historians of American architecture urbanism The essays are arranged chronologically from colonial to contemporary accessible in thematic groupings *Coastal Architectures and Politics of Tourism* Sibel Bozdoğan, Panayiota Pyla, Petros Phokaides, 2022-07-29 This volume offers a critical and complicated picture of how leisure tourism connected the world after the World War II transforming coastal lands traditional societies and national economies in new ways The 21 chapters in this book analyze selected case studies of architectures and landscapes around the world contextualizing them within economic geographies of national development the geopolitics of the Cold War the legacies of colonialism and the international dynamics of decolonization Postwar leisure tourism evokes a rich array of architectural spaces and altered coastal landscapes which is explored in this collection through discussions of tourism developments in the Mediterranean littoral such as Greece Turkey and southern France as well as compelling analyses of Soviet bloc seaside resorts along the Black Sea and Baltic coasts and in beachscapes and tourism architectures of western and eastern hemispheres from Southern California to Sri Lanka South Korea and Egypt This collection makes a compelling argument that leisurescapes far from being supra ideological and apolitical spatial expressions of modernization development and progress have often concealed histories of conflict violence
