Literacy Practices for Urban Elementary Students* Lakia M. Scott, Barbara Purdum-Cassidy, 2016-08-17 The nation's
demographic of public schools are more ethnically racially and linguistically diverse than ever before Strauss 2014 However
there are still educational policies and practices that call to question whether traditionally marginalized students receive an
equitable education This is demonstrated in national achievement trends which highlight disproportionality ratings among
minoritized student groups Also when examining school discipline policies expulsion ratings special education services and
school choice movements all seem to handicap educational opportunity for low income Black and Brown students As
American schools become more and more diverse it is imperative that the literacy practices used to teach young students of
color reflect the nation's changing demographic This book provides practical insights guided by conceptual and contextual
knowledge in understanding how to teach urban African American and Hispanic Latino students by discussing issues
associated with critical pedagogies literacy and culturally appropriate instructional strategies that have demonstrated
success for traditionally marginalized student populations This book examines culturally affirming literacy practices from
three main components 1 scholarship 2 the field of practice and 3 teacher education models Each of these three are
significant in understanding how to teach minoritized populations As such chapters have been organized into three main
sections that address scholarship and research trends in the field and implications for teacher education models all in order
to advance the literacy achievement of African American and Hispanic Latino students
