Little Jelly J Pamela Ferry-Tsitos, 2013-06-14 *Little Jelly J* is an innovative learning publication Teaching children that in life we all must TRY TRY TRY The stories are focused for ages three to nine Alina Paris Tsitos created the cover drawing when she was six and her grandmother Pamela Ferry Tsitos was captivated by the expression on the face of the drawing and remembered her story written in 1991 She then decided that the drawing and the story belonged together Additional illustrations were drawn by Alina when she was seven years old The author uses the drawings to capture the hearts of children and teach them with childlike drawings adapted to several of the events The author believes that the happy face depicted in Alina s drawings of Jelly set the stage for a happy experience for children and adults alike LITTLE JELLY J Visits Greece the Fun Way will be released in December 2013 Alina s brother Kade A Tsitos will be the photographer in Greece and will supply photos of Greece for children to enjoy Alina will illustrate with her drawings all about family history and fun in Greece All JELLY J publications include blank pages in the back of the book to encourage each and all to draw their own little Jelly J from some of her special experiences Jelly J will be an educational series and will be popular with all children including children with special learning issues

Long Hard Road Charles J. Murray, 2022-09-15 *Long Hard Road* The Lithium Ion Battery and the Electric Car provides an inside look at the birth of the lithium ion battery from its origins in academic labs around the world to its transition to its new role as the future of automotive power It chronicles the piece by piece development of the battery from its early years when it was met by indifference from industry to its later emergence in Japan where it served in camcorders laptops and cell phones The book is the first to provide a glimpse inside the Japanese corporate culture that turned the lithium ion chemistry into a commercial product It shows the intense race between two companies Asahi Chemical and Sony Corporation to develop a suitable anode It also explains for the first time why one Japanese manufacturer had to build its first preproduction cells in a converted truck garage in Boston Massachusetts Building on that history *Long Hard Road* then takes readers inside the auto industry to show how lithium ion solved the problems of earlier battery chemistries and transformed the electric car into a viable competitor Starting with the Henry Ford and Thomas Edison electric car of 1914 it chronicles a long list of automotive failures then shows how a small California car converter called AC Propulsion laid the foundation for a revolution by packing its car with thousands of tiny lithium ion cells The book then takes readers inside the corporate board rooms of Detroit to show how mainstream automakers finally decided to adopt lithium ion *Long Hard Road* is unique in its telling of the lithium ion tale revealing that the battery chemistry was not the product of a single inventor nor the dream of just three Nobel Prize winners but rather was the culmination of dozens of scientific breakthroughs from many inventors whose work was united to create a product that ultimately changed the world
