Reading and Writing for Pleasure Teresa Cremin, Helen Hendry, Liz Chamberlain, Samantha Jayne Hulston, 2025-09-12

Reading and writing for pleasure represent issues of global concern and interest in policy research and practice underpinned by evidence illustrating their importance for young people's academic, social and emotional experiences and outcomes. In the face of a sustained decline in children's enjoyment in both reading and writing, this highly significant book presents findings from a three-year study of research and practice that nurtures young people's engagement as readers and writers. The book offers a rich understanding of the study, highlighting the commonalities and synergies identified from the research literature and diverse practice contexts. It introduces a new and powerful Reading and Writing Framework for Practice for schools and charitable literacy programmes. The authors offer practical strategies and recommendations throughout for practitioners, researchers and policy makers who wish to advance this agenda in their own contexts. Areas covered include: The nature of reading and writing for pleasure; Literate identities; Motivating readers and writers; Social interactions; Role models and connected communities; Future research practice and policy. This field-defining text is a key resource for all those committed to halting the decline in young people's engagement as volitional readers and writers. **Surviving High School** M.

Doty, 2012-09-04 StartFragment What's the secret to surviving your freshman year of high school? Emily Kessler thinks she has it all figured out. She eats, sleeps and trains for competitive swimming. All she has to do is keep her grades high and swim times short enough to live up to her sister Sara's. But walking the crowded maze of unfamiliar high school hallways is like diving headfirst into shark-infested waters. Shark 1: Dominique, her biggest competition on the swim team and all-around mean girl. Shark 2: The adorable and popular Ben Kale. Emily can't resist his smile, no matter how hard she tries. When the pressure builds to the point where Emily isn't sure she can stay afloat, she begins to question the strict path her life has always followed. Maybe there is more to life than studying and swimming. Maybe the secret to surviving high school is just to have a little fun. The hit mobile game *Surviving High School* comes to life in an original novel about perfection, failure and following your dreams. **Online Afterlives** Davide Sisto, 2020-09-01

How digital technology from Facebook tributes to QR codes on headstones is changing our relationship to death. Facebook is the biggest cemetery in the world with countless acres of cyberspace occupied by snapshots, videos, thoughts and memories of people who have shared their last status updates. Modern society usually hides death from sight as if it were a character flaw and not an ineluctable fact. But on Facebook and elsewhere on the internet, we can't avoid death; digital ghosts, electronic traces of the dead, appear at our click or touch. On the Internet, at least, death has once again become a topic for public discourse. In *Online Afterlives*, Davide Sisto considers how digital technology is changing our relationship to death. *Read with Me* Samantha Cleaver, Munro

Linder,Cindy M. Lee,Shannon K Stefl,Karen A.

High,2022-12-01 Faculty in the science technology engineering and mathematics STEM disciplines face intensifying

pressures in the 21st century including multiple roles as educator researcher and entrepreneur In addition to continuously increasing teaching and service expectations faculty are engaged in substantive research that requires securing external funding mentoring other faculty and graduate students and disseminating this work in a broad range of scholarly outlets Societal needs of their expertise include discovery innovation and workforce development It is critical to provide STEM faculty with the professional development to support their complex roles and to base this development on evidence derived from research This edited handbook provides STEM stakeholders with an opportunity to share studies and or experiences that explore STEM faculty development FD in higher education settings More specifically we include work that examines faculty development planning techniques models experiences and outcomes focused on supporting the teaching research service and leadership responsibilities of STEM faculty The Handbook is suited for researchers and practitioners in STEM STEM Education Mathematics Science Technology and Engineering disciplines It is also suited towards faculty developers higher education administrators funding agencies industry leaders and the STEM community at large This handbook is organized around three constructs INPUTS MECHANISMS and OUTPUTS The STEM faculty development inputs construct focuses on topics related to the characteristics of faculty members and institutions that serve as barriers or supports to the adoption and implementation of holistic STEM faculty development programs Questions addressed in the handbook around this topic include What barriers supports exist for STEM faculty How are these barriers supports being addressed through STEM FD How do contexts e g economic political historical influence faculty administrative needs related to STEM FD How do demographics e g gender ethnicity age family background influence faculty administrative needs related to STEM FD The STEM faculty development mechanisms construct focuses on topics related to the actual implementation of STEM faculty development and we consider the potential models or structures of STEM faculty development that are currently in place or conceptualized in theory Questions addressed in the handbook around this topic include What are the processes for developing models of STEM FD What are effective models of STEM FD How is effectiveness determined What roles do stakeholders e g faculty administration consultants play within STEM FD mechanisms The STEM faculty development outputs construct focuses on how to best understand the influence of STEM faculty development on outcomes such as productivity teacher quality and identity in relation to faculty development Questions addressed in the handbook around this topic include How has STEM FD influenced higher education practices and settings What are appropriate output measures and how are they used in practice What collaborations emerge from STEM FD How does STEM FD affect other STEM stakeholders e g students administration business community The aim for this handbook was to examine the multifaceted demands of faculty roles and together with members of the STEM education community envision pathways through which universities and individuals may support STEM colleagues regardless of their experience or rank to enjoy long and satisfying careers Our hope is for these chapters to aid readers in deep reflection on challenges faculty face to contemplate adaptations

of models presented and to draw inspiration for creating or engaging in new professional development programs Chapters across this handbook highlight a variety of institutional contexts from 2 year technical colleges to teaching focused institutions in addition to research centric settings Some chapters focus primarily on teaching and learning practices and offer models for improving STEM instruction Others focus on barriers that emerge for STEM faculty when trying to engage in development experiences There are chapters that examine tenure structures in relation to faculty development and how STEM FD efforts could support research endeavors Mentorship and leadership models are also addressed along with a focus on equity issues that permeate higher education and impact STEM FD It is our sincere hope that this Handbook sparks increased discourse and continued explorations related to STEM FD and in particular the intentional focus of faculty development initiatives to extend to the many facets of academic life
