Ageing population and rapid urbanisation are the two major demographic shifts in today's world Architectural designs and urban policies have to deal with issues of an ever larger elderly population living in the cities especially in old urban neighbourhoods while also taking into consideration the evolving lifestyles and wellbeing of the diverse elderly demographic Being able to continue living in these existing urban neighbourhoods would thus require necessary interventions both to adapt the changing needs of the ageing population and to improve the deteriorating environment for better liveability *Creative Ageing Cities* discusses the participation and contribution of the ageing population as a positive and creative force towards urban design and place making particularly in high density urban contexts as observed in a collection of empirical cases found in rapidly ageing Asian cities This book is the first to bring together multidisciplinary scholastic research on ageing and urban issues from across top six ageing cities in

Asia Singapore Seoul Tokyo Taipei Hong Kong and Shanghai Through these case studies this book gives a good overview of diverse challenges and opportunities in the various Asian urban contexts and offers a new perspective of an ageing and urban design framework that emphasises multi stakeholder collaboration inter generational relations and the collective wisdom of older people as a source of creativity

Environmental Gerontology in Europe and Latin America Diego Sánchez-González, Vicente Rodríguez-Rodríguez, 2015-11-03 This book looks at the relationships between the physical social environment and the elderly in Europe and Latin America from the Environmental Gerontology perspective and through geographical and psychosocial approaches It addresses the main environmental issues of population ageing based on an understanding of the complex relationships adjustments and adaptations between different environments home residence public spaces landscapes neighbourhoods urban and rural environment and the quality of life of the ageing population associated with residential strategies and other aspects related to health and dependency The different levels of socio spatial analysis are also explored macro urban and rural environments regions and landscapes meso neighbourhood public space

and micro personal home and institution New theoretical and methodological approaches are proposed to analyse the attributes and functions of the physical social environment of the elderly as well as new ways of living the ageing process All will have to respond to the challenges of urbanisation globalisation and climate change in the 21st century Also the different experiences and challenges of public planning and management professionals involved with the growing ageing population are presented and will require greater association and collaboration with the academic and scientific fields of Environmental Gerontology

The Global Age-Friendly Community Movement Philip B. Stafford, 2018-10-19 The age friendly community movement is a global phenomenon currently growing with the support of the WHO and multiple international and national organizations in the field of aging Drawing on an extensive collection of international case studies this volume provides an introduction to the movement The contributors both researchers and practitioners touch on a number of current tensions and issues in the movement and offer a wide ranging set of recommendations for advancing age friendly community development The book concludes with a call for a radical transformation of a medical and lifestyle model of aging into a relational model of health and social individual wellbeing

Retrofitting Sprawl Emily Talen, 2015-08-15 These twelve previously unpublished essays present innovative and practical ideas for addressing the harmful effects of sprawl Sprawl is not only an ongoing focus of specialized magazines like Dwell indeed Time magazine has cited recycling the suburbs as the second of Ten Ideas Changing the World Right Now While most conversations on sprawl tend to focus on its restriction this book presents an overview of current thinking on ways to fix repair and retrofit existing sprawl Chapters by planners geographers designers and architects present research grounded in diverse locales including Phoenix Arizona Seattle Washington Dublin Ohio and the Atlanta Georgia and Washington D C metro areas The authors address head on the most controversial aspects of sprawl issues of power and control justice and equity and American attitudes about regulating private development But they also put these issues in practical contexts bringing in examples of redesign that are already occurring around the country including the retrofitting of corridors and the repurposing of cul de sacs Whether fixing sprawl requires a cultural shift in thinking or a coordinated effort by local government these essays testify that a combination of forethought and creative thinking will be needed

The New Neighborhood Senior Center Joyce Weil, 2014-11-03 In 2011 seven thousand American baby boomers those born between 1946 and 1964 turned sixty five daily As this largest U S generation ages cities municipalities and governments at every level must grapple with the allocation of resources and funding for maintaining the quality of life health and standard of living for an aging population In The New Neighborhood Senior Center Joyce Weil uses in depth ethnographic methods to examine a working class senior center in Queens New York She explores the ways in which social structure directly affects the lives of older Americans and traces the role of political social and economic institutions and neighborhood processes in the decision to close such centers throughout the city of New York Many policy makers and gerontologists advocate a concept of aging in place whereby the communities in which these

older residents live provide access to resources that foster and maintain their independence But all aging in place is not equal and the success of such efforts depends heavily upon the social class and availability of resources in any given community Senior centers expanded in part by funding from federal programs in the 1970s were designed as focal points in the provision of community based services However for the first wave of boomers the role of these centers has come to be questioned Declining government support has led to the closings of many centers even as the remaining centers are beginning to rebrand to attract the boomer generation However The New Neighborhood Senior Center demonstrates the need to balance what the boomers want from centers with the needs of frailer or more vulnerable elders who rely on the services of senior centers on a daily basis Weil challenges readers to consider what changes in social policies are needed to support or supplement senior centers and the functions they serve
