Living Fossil The Story Of The Coelacanth:

Living Fossil: The Story of the Coelacanth Keith Stewart Thomson, 1992-07-17 Tells the story of a fish the coelacanth thought extinct for 70 million years which was discovered in 1938 in the Indian Ocean **Living Fossil** Keith Stewart Thomson, 1991 An engrossing tale of obsession adventure and scientific reasoning Betty Ann Kevles Los Angeles Times **C. Ferslew & Co. litografisk Etablissement, Bogtrykkeri & Nodetrykkeri, Gravør Etablissement, Bogbinderi samt Fabrik og Udsalg af Kontor- og Regnskabsbøger** ,1874 **Search for a Living Fossil** Eleanor Clymer, 1966 Living Fossil Keith Thomson, 1991-01 Off the coast of Southern Africa a fishing boat drags in a strange creature A museum curator and a fish expert realize that they are looking at an animal from another time This is a tale of modern science chance capture international rivalry and the obsessive personalities of the scientists The coelacanth lives in the deep waters around one group of tiny islands Why Can it survive What other forgotten creatures remain to be discovered The Annotated Old Four Legs: The story of the coelacanth Mike Bruton, 2017-11-01 When the famous South African fish scientist Professor JLB Smith published *Old Fourlegs The Story of the Coelacanth* in 1956 he created an international sensation After all this 400 million year old fish known only from fossil remains was thought to have become extinct around 66 million years ago JLB Smith s dramatic account of the discovery of the first and second coelacanths in 1938 and 1952 turned him into a cult figure and put South African science on the world map His book was eventually published in six English editions and translated into nine foreign languages Mike Bruton s *The Annotated Old Fourlegs* includes a facsimile reprint of the original book to which he has added notes and images in the margins that provide an interesting and revealing commentary on Smith s text as well as new introductory and explanatory chapters that bring the coelacanth story up to date **Fossil Fish Found Alive** Sally M. Walker, 2002 Describes the 1938 discovery of the coelacanth a fish previously believed to be extinct and subsequent research about it Coelacanth Valerie J. Weber, 2005 Describes the physical characteristics of a fish that is thought to have lived 400 million years ago **Genetics in the Wild** John C. Avise, 2014-05-27 Award winning geneticist John C Avise guides this delightful voyage around the planet in search of answers to nature s mysteries He demonstrates how scientists directly examine DNA to address long standing questions about wild animals plants and microbes Through dozens of stories that span the world nature emerges as a realm where truth can be far stranger than fiction From a 100 ton mushroom to egg swapping birds extinct ground sloths to microbes inside our bodies Avise examines a cornucopia of natural history topics and explains how today s modern genetic techniques offer novel insights Do armadillo litters really contain clones When is a fig tree not just a single tree Where have migratory whales traveled Who are the mothers of the embryos carried by pregnant male seahorses What insect was the world s earliest farmer How closely related are Neanderthals to modern humans Answers to these and many more questions are presented here in a straightforward manner that reveals Avise s enthusiasm for uncovering nature s hidden ways Each entry is accompanied by a beautiful illustration from Trudy Nicholson widely

recognized as one of today's leading nature artists *The Making of Princeton University* James Axtell, 2021-03-09 In 1902 Professor Woodrow Wilson took the helm of Princeton University then a small denominational college with few academic pretensions But Wilson had a blueprint for remaking the too cozy college into an intellectual powerhouse *The Making of Princeton University* tells for the first time the story of how the University adapted and updated Wilson's vision to transform itself into the prestigious institution it is today James Axtell brings the methods and insights from his extensive work in ethnohistory to the collegiate realm focusing especially on one of Princeton's most distinguished features its unrivaled reputation for undergraduate education Addressing admissions the curriculum extracurricular activities and the changing landscape of student culture the book devotes four full chapters to undergraduate life inside and outside the classroom The book is a livelywarts and all rendering of Princeton's rise addressing such themes as discriminatory admission policies the academic underperformance of many varsity athletes and the controversial bicker system through which students have been selected for the University's private eating clubs Written in a delightful and elegant style *The Making of Princeton University* offers a detailed picture of how the University has dealt with these issues to secure a distinguished position in both higher education and American society For anyone interested in or associated with Princeton past or present this is a book to savor

Rebels, Scholars, Explorers Annalisa Berta, Susan Turner, 2020-10-27 Unearthing the amazing hidden stories of women who changed paleontology forever For centuries women have played key roles in defining and developing the field of vertebrate paleontology Yet very little is known about these important paleontologists and the true impacts of their contributions have remained obscure In *Rebels Scholars Explorers* Annalisa Berta and Susan Turner celebrate the history of women bone hunters delving into their fascinating lives and work At the same time they explore how the discipline has shaped our understanding of the history of life on Earth Berta and Turner begin by presenting readers with a review of the emergence of vertebrate paleontology as a science emphasizing the contributions of women to research topics and employment This is followed by brief biographical sketches and explanations of early discoveries by women around the world over the past 200 years including those who held roles as researchers educators curators artists and preparators Forging new territory Berta and Turner highlight the barriers and challenges faced by women paleontologists describing how some managed to overcome those obstacles in order to build careers in the field Finally drawing on interviews with a diverse group of contemporary paleontologists who share their experiences and offer recommendations to aspiring fossil hunters they provide perspectives on what work still needs to be done in order to ensure that women's contributions to the field are encouraged and celebrated Uncovering and relating lost stories about the pivotal contributions of women in vertebrate paleontology doesn't just make for enthralling storytelling but also helps ensure a richer and more diverse future for this vibrant field Illuminating the discoveries collections and studies of fossil vertebrates conducted by women in vertebrate paleontology *Rebels Scholars Explorers* will be on every paleontologist's most wanted list and should find a broader audience

in the burgeoning sector of readers from all backgrounds eager to learn about women in the sciences **Origins** Frank H. T. Rhodes, 2016-07-28 No detailed description available for Origins **Glass House** Ken Ham, Bodie Hodge, 2019-02-20 Evolution as an idea is considered a rock solid truth among secular scientists but when you begin looking at the evidence and asking simple questions you find their conclusions to be just fragile assumptions unproven myth and outright misconceptions like a glass house built on shifting sands Discover the pervasive influences of the atheistic religion of Darwinian evolution Learn what science is and how science is actually devastating to evolution Explore how evolution developed from unproven science to a popular and cultural worldview Now a powerful team of credentialed scientists researchers and Biblical apologists take on the pillars of evolution and the truths they reveal decimate Darwin's beliefs using a Biblical and logical approach to evidence What Evidence Shows that DNA Was Created by the God? Victor W. Chang, Guoping Song, 2020-07-04 Where do we come from Who are we Where are we going These three questions continue to haunt human beings since ancient times and they are questions without any explanations The important conclusions from the human genome test of the DNA coding sequence The autosomes are not different between men and women These conclusions irreversibly refute the traditional theory of evolution We have raised this simple question to seven M D Ph D including three professors who specialize in biology Why are autosomes not different between men and women Invariably their answer was either I cannot explain or I don't know To me as a computer engineer the human genome is equivalent to a software package If we are certain that the 2.9 billion codes of autosomes are not different between men and women then the autosomes must be from the same source sequence of coding I am sure that such a huge coding sequence must have a maker He made the human genome Now we can reach another conclusion the first woman came from the first man by the fact that the 2.9 billion codes of autosomes are not different between men and women The next conclusion is that the first man never came from a woman and he must have neither physical parents nor a regular physiological birth This is a key to open the origins of mankind DNA reveals to us the truth that God created life **Beyond the Line** Georg Berkemer, Derek L. Elliot, Ute Fendler, Margret Frenz, Michael Mann, Ineke Phaf-Rheinberger, Sebastian R. Prange, Ana Sobral, Frank Schulze-Engler, 2014-04-23 The title of Beyond the Line refers to the imaginary Line drawn between North and South a division established by the Peace Treaty of Cateau Cambrésis in 1559 This is an early modern time and Eurocentric construction according to which the southern oceanic world has long been taken as symbol of expansionist philosophies and practices An obvious motivation for changing this Line division is the growing influence of the Global South in the contemporary economic and political setting However another motivation for changing opinions in regard to the Line is equally important We observe an emergent consciousness of the pivotal role of the oceanic world for human life This requires the reformulation of former views and raises numerous questions A diversity of connections comes to the mind which demands the composition of a catalogue of case studies with an oceanic horizon Through this operation different problems

are being linked together Which problems encounter historians with their research on fishes in the archives How to trace records about pirates of non European descent in the Indian Ocean Which role play the Oceans as mediators for labor migrations not only of the Black Atlantic but also of people moving from Asia to Africa and vice versa What do we know about workers on the oceans and their routes When considering oceans as contact zones with which criteria can their influence in different literary texts be analyzed Is it possible to study nationalisms taking into account these transoceanic relationships And how do artists address these questions in their use of the media Against the background of this catalogue of oceanic questions old stories are told anew Sometimes their cultural stereotypes are recycled to criticize political and social situations Or in other cases they are adopted for elaborating alternative options In this sense the contributions concentrate on countries like India Kenya Angola or Brazil and cover different academic fields A variety of objects and situations are explored which have been and still are determinant for the construction of cultural narratives in view of the modified relationship with the geographically southern oceanic regions

Charles Darwin's Barnacle and David Bowie's Spider Stephen B. Heard, 2020-03-17 An engaging history of the surprising poignant and occasionally scandalous stories behind scientific names and their cultural significance Ever since Carl Linnaeus's binomial system of scientific names was adopted in the eighteenth century scientists have been eponymously naming organisms in ways that both honor and vilify their namesakes This charming informative and accessible history examines the fascinating stories behind taxonomic nomenclature from Linnaeus himself naming a small and unpleasant weed after a rival botanist to the recent influx of scientific names based on pop culture icons including David Bowie's spider Frank Zappa's jellyfish and Beyoncé's fly Exploring the naming process as an opportunity for scientists to express themselves in creative ways Stephen B Heard's fresh approach shows how scientific names function as a window into both the passions and foibles of the scientific community and as a more general indicator of the ways in which humans relate to and impose order on the natural world

Hofmeyr Frederick E. Grine, 2022-12-29 This edited volume provides the historical and geological background as well as the details pertaining to the morphology and morphometric assessments of a singular human cranial specimen from the Late Pleistocene discovered in Hofmeyr South Africa The chapters are divided into 4 main sections Section 1 discusses the discovery and historical context of the skull while section 2 addresses its geological and geochronological contexts through dating and stable isotope analyses Section 3 details the general morphological and morphometric analyses description 3 D reconstruction morphological comparisons and section 4 details the specific morphological analyses performed inner ear dentition endocranial morphology and size The volume will be of interest to professional and student paleoanthropologists interested in the later phases of human evolution
