Government Revolution Government Procurement 25:

The State of Open Data Davies, Tim, Walker, Stephen B., Rubinstein, Mor, 2019-05-22 It s been ten years since open data first broke onto the global stage Over the past decade thousands of programmes and projects around the world have worked to open data and use it to address a myriad of social and economic challenges Meanwhile issues related to data rights and privacy have moved to the centre of public and political discourse As the open data movement enters a new phase in its evolution shifting to target real world problems and embed open data thinking into other existing or emerging communities of practice big questions still remain How will open data initiatives respond to new concerns about privacy inclusion and artificial intelligence And what can we learn from the last decade in order to deliver impact where it is most needed The State of Open Data brings together over 60 authors from around the world to address these questions and to take stock of the real progress made to date across sectors and around the world uncovering the issues that will shape the future of open data in the years to come *The Internationalization of Government Procurement Regulation* Aris Georgopoulos, Bernard Hoekman, Petros C. Mavroidis, 2017-02-16 As governments are major buyers of goods and services foreign companies are keen to be able to participate in procurement opportunities on an equal footing with national firms This has given rise to the inclusion of procurement disciplines in trade agreements and to internationally agreed good regulatory practices in this important policy area The contributions to this book examine how the dynamic mix of bilateral regional plurilateral and international norms on government procurement is reflected in purchasing practices at the national level and whether these are leading to convergence in policies and approaches The countries studied span both advanced high income economies and emerging economies Some are members of the WTO procurement agreement others are not Most WTO members have decided not to commit to binding international disciplines on procurement in trade agreements This book explores whether there has been nonetheless internationalization of good procurement practices and what current public purchasing processes suggest as regards the value added of signing on to binding rules of the game in this area The approach taken in the volume is interdisciplinary Contributors include economists political scientists legal scholars and practitioners with a solid understanding of both the extant international disciplines and national government procurement policies Each chapter assesses the current state of play as regards legislation and procurement practices the degree to which industrial policy considerations feature in the relevant regulatory frameworks the existence and use of domestic dispute resolution and review procedures that allow firms to contest the behavior of procuring entities and the availability of data on procurement processes and outcomes **International Commerce** , 1966-10 *Air University Library Index to Military Periodicals* , 1992 Public Procurement and the EU Competition Rules Albert Sánchez Graells, 2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This work is the most comprehensive attempt to

date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law

Voices at Work Alan Bogg, Tonia Novitz, 2014-04-03 This edited collection is the culmination of a comparative project on Voices at Work funded by the Leverhulme Trust 2010 2013 The book aims to shed light on the problematic concept of worker voice by tracking its evolution and its complex interactions with various forms of law Contributors to the volume identify the scope for continuity of legal approaches to voice and the potential for change in a sample of industrialised English speaking common law countries namely Australia Canada New Zealand UK and USA These countries facing broadly similar regulatory dilemmas have often sought to borrow and adapt certain legal mechanisms from one another The variance in the outcomes of any attempts at borrowing seems to demonstrate that despite apparent membership of a common law family there are significant differences between industrial systems and constitutional traditions thereby casting doubt on the notion that there are definitive legal solutions which can be applied through transplantation Instead it seems worth studying the diverse possibilities for worker voice offered in divergent contexts not only through traditional forms of labour law but also such disciplines as competition law human rights law international law and public law In this way the comparative study highlights a rich multiplicity of institutions and locations of worker voice configured in a variety of ways across the English speaking common law world This book comprises contributions from many leading scholars of labour law politics and industrial relations drawn from across the jurisdictions and is therefore an exceedingly comprehensive comparative study It is addressed to academics policymakers legal practitioners legislative drafters trade unions and interest groups alike Additionally while offering a critique of existing laws this book proposes alternative legal tools to promote engagement with a multitude of voices at work and therefore foster the effective deployment of law in industrial relations
